**WE ARE HAPPY
TO BE MEASURED
ON OUR QUALITY.
WE HAVE BEEN FOR
GENERATIONS.**

The success of our customers is our motivation. This is a long tradition. When my grandfather, Alexander Wiegand, founded the company of WIKA in 1946, he devoted himself to absolute quality, reliability and customer focus. Although much has changed since then, it is precisely these values that form the core of the WIKA Group today.

As a family-run business which acts globally, we are known worldwide as a market leader in pressure and temperature measurement, and also in calibration technology. We also set the standard in the measurement of level, force and flow. We will continue widening our offering, and thus make it ever more attractive for our customers. In the meantime, we are active in over 75 countries and in the majority with our own local subsidiaries – thus we can ensure we are close to our customers. With their knowledge and commitment, more than 10,000 highly qualified employees contribute every day to the success of our customers. This is one reason why about 600 million of our measuring instruments are in use worldwide.

We will push ahead systematically with the development of the WIKA Group. Although we are open to change here, quality, reliability and customer focus will always remain the constants in our actions. This you can also rely on in the future.

Alexander Wiegand, Chairman and CEO, WIKA

INTERNATIONAL

**YOU HAVE SPECIFIC
REQUIREMENTS.
WE HAVE THE
EXPERTS.**

You can rely on WIKA quality, wherever you are in the world. With manufacturing locations around the globe, we ensure the highest flexibility and delivery performance.

ALL AROUND THE WORLD – CLOSE TO OUR CUSTOMERS

Proximity to our customers is essential for efficient solutions. Whether standard products or custom designs: Working with you we'll find the right concepts for your requirements.

To meet this demand wherever it arises, we are a strong group of companies with a worldwide presence through our wholly-owned subsidiaries. Our experienced engineers and sales specialists are your competent and reliable contacts locally. They know the country-specific conditions, standards and applications, and will dedicate the time for your individual requirements.

Thus, around the world you have access to our unique know-how and product range. Whether you want to measure to 0.5 mbar or to 15,000 bar, whether 250 °C below zero or 1,800 °C above, whether in a clean room or on an oil rig: For every industry and in every situation we offer first-class performance and reliability. Through strategic acquisitions, we are continuously expanding our portfolio.

WIKA in brief

INDUSTRIAL

PROCESS

CALIBRATION TECHNOLOGY AND SERVICE

RELIABILITY IS YOUR DEMAND. AND OUR COMMITMENT.

In the area of industrial applications, WIKA provides absolute reliability with a comprehensive product portfolio. For example, our instruments are used in machine tools, pumps, compressors, air-conditioning systems, pressure vessels, in mobile hydraulics and also in gas distribution systems.

FIRST-CLASS PERFORMANCE FOR INDUSTRIAL APPLICATIONS

The requirements are diverse and demanding. Depending on the industry, various parameters as well as different standards and directives must be considered.

Here we offer many years of experience and comprehensive expertise. In addition to our wide range of products and as a result of our research and development, we are continually designing new products and combinations of instruments. As a reliable OEM partner, we develop individual solutions together with our customers. Our technical knowledge and high-tech production facilities enable the production of high volumes at competitive prices with short lead times.

We support companies in general machine building with industry-specific instrumentation solutions for pressure, temperature, level, flow and force measurement. With WIKA you can always rely on the highest quality and flexibility, fair prices and reliable delivery.

**QUALITY ENSURES
PROCESS SAFETY.
WE ENSURE QUALITY.**

11

With an extensive product range, we are equal to all challenges in the field of process applications. Thus our instruments bring maximum performance to applications such as gas and steam turbines, cooling water systems, oil platforms and refineries.

DEPENDABLE UNDER THE HARSHTEST PROCESS CONDITIONS

When it's tough, WIKA measuring instruments show their strength: whether that's in harsh external conditions, aggressive media, hazardous areas or sterile processes.

Thanks to our comprehensive standard range of pressure, temperature and level measuring instruments, as well as primary elements for flow measurement, excellent calibration technology and our worldwide customer service we are always able to offer you the right solution. Our certified measuring instruments comply with all major international directives, feature worldwide approvals and meet the highest standards of quality and safety.

By using the most versatile of materials, we enable precise measurement under the widest range of external influences. Our measuring instruments guarantee, at all times, the maximum safety for people, processes and the environment.

As a reliable partner in process instrumentation, we can support you through all project and investment phases, from planning, through the realisation and implementation of the project to technical inspections, logistics solutions, on-site support and after-sales service.

**FOR YOU, PRECISION
IS A MUST.
FOR US IT GOES
WITHOUT SAYING.**

Through modern instrument design with excellent equipment features, our calibration instruments fulfil the highest demands of operator convenience and performance.

**CALIBRATION TECHNOLOGY AND SERVICE:
RELIABLE, PATENTED, PROVEN**

In calibration technology too, we set standards with the highest precision. Whether the on-site service of your equipment for a safe audit or a fully automatic calibration system: We offer a comprehensive spectrum of products and services – and thus also the right solution for your requirements.

In our portfolio you will find established brands and high-quality instruments, with tried and tested functionality, in all accuracy classes and with different levels of automation. Around the world, we have laboratories that are accredited in accordance with appropriate national standards. For you, this means short distances and your equipment calibrated quickly. In many countries we can even come directly to your business with our own mobile calibration vans.

As an independent service provider, we offer our services for instruments from all manufacturers. And, incidentally, within our excellent service offering, we can also consult and train your employees in all aspects related to calibration.

RESPONSIBILITY THROUGH TRADITION

YOUR RELIABLE PARTNER

The WIKA group of companies is an enterprise which acts globally. At the same time, as a family business, we are committed to traditional values. Thus our actions have always been characterised by a social responsibility towards both people and the environment. In this respect, signing the Code of Conduct of the ZVEI (German Central Association of the Electrical and Electronics Industry) was only logical and it is in our interest that this is also followed by our suppliers.

Sustainability and environmentally compatible processes are a central part of our responsibility. Within our global quality strategy we have established matrix certification, with the help of which we standardise the process quality throughout the WIKA Group and can initiate continuous improvement. The audits are carried out externally and independently by a world-renowned certification body.

Of course we have a particular responsibility to our staff. We put a high value on the health of every single employee. With comprehensive training opportunities, we also promote the steady improvement of the individual.

**YOUR TRUST
IS OUR MOTIVATION.
EACH AND EVERY DAY.**

We achieve continuous improvement with consistent lean management. We also plan and improve our production processes continuously in accordance with the KAIZEN philosophy. Complex quality problems are dealt with in a structured way by in-house Black Belts using the Six Sigma Method, thus ensuring lasting solutions.

In close OEM partnerships, we also develop customer-specific solutions and provide long-term security of supply. Continuous optimisation, market and customer orientation, an uncompromising approach to quality, employee satisfaction and environmental protection are firmly entrenched elements of our management system. That is why, for today and for tomorrow, we are your reliable partner in measurement technology.
