WARM YOU UP ELEGANTLY

Panel heaters enable fast heating wherever needed. The air from the room enters the heater through the opening on the bottom. Electric heater warms the air with a help of aluminium exchanger. Warm air slowly rises and circles in the room, and therefore quickly and efficiently heats up the room. The outlet of the hot air is directed to the room and not to the wall, which also prevents the wall from getting dark. Thanks to its modern, elegant and slim design it is perfect addition to your home.

FREESTANDING OR WALL-MOUNTED

All models offer a freestanding or wall-mounted solution. Move the appliance to the place where heating is needed, or position it on fixed location with attached hanger.

ECO

ECO FUNCTION

The heater contains two heating elements (2x1000W), which you can individually switch on, according to the room temperature you would like to have.

SILENT OPERATION

The heater's operation is almost completely silent and it will not disturb you at all. Just relax and enjoy.

OPTIHEAT 2000MP

WALL-MOUNTED OPTION
Easy to install

Wall mounting is perfect for fixed positioning. Thanks to the included hanger, the installation of the heater is extremely easy. Because of the slim design, the use of the space is optimal.

gorenje

TEMPERATURE OF YOUR CHOICE
16-40°C
Choose between 16–40 °C

The heater allows setting the heating temperature between 16 and 40 °C. With the simple controls, you can make sure the temperature in the room is always perfect for you.

BUILT-IN THERMAL PROTECTION
OFF
Overheat protection

The heater has built-in overheating protection. Thus, the inside of the heater is protected from overheating that could, in turn, cause overheating of electronic parts and the heating elements.

SLIM DESIGN
Modern & practical

The shape of the heater is adjusted to the maximum usage and at the same time it is an excellent stylish accessory.

TEMPERED GLASS
Optimal resistance

Tempered glass is more heat resistant than normal glass. It has a high bending strength and is more heat resistant. One of the main features is that if it breaks, it will crumble into small granular chunks instead of splintering into jagged shards as normal glass does.
