

MICROWELL 2019

 SWIMMING POOL DEHUMIDIFIERS

 ADD HEAT PUMPS

"We conceive new possibilities, shape new technologies, and make our products forerunners."

Ing. Tibor Kovacs, CEO

INTERNATIONAL SALES NETWORK

From its foundation in 1992, MICROWELL Ltd. is firmly present on the global market, with 750 distributors and partners in 30+ countries across Europe, Russia, Middle East and North Africa. All products are proudly developed and manufactured in Slovakia.

Slovakia is European Union, Schengen area and Eurozone member.

MICROWELL MILESTONES

Microwell launches production of DRY SIREN 2nd generation. New line of heat pumps G<u>REEN LINE with R32 refrigerant is introduced.</u>

DRY SIREN successfully installed in numerous pools in 5 countries. New high-tech testing facility for heat pumps built.

> Microwell celebrates 25 years! Start of development of new revolutionary concept of DRY SIREN dehumidifier.

New production site in operation.

DRY 500 Metal swimming pool dehumidifier awarded Product of the year at Aquatherm Slovakia.

Hungarian subsidiary with an office in Budapest is established. Swimming pool heat pumps are exported to Poland.

Dehumidifiers are sold to England and Bulgaria.

2017

2013

2010

2003

2001

First heat pumps for Slovak and Czech customers are produced.

Microwell opens distribution of swimming pool dehumidifiers in Germany.

DRY 500 Metal swimming pool dehumidifier is awarded Product of the year prize at Aquatherm Slovakia exhibition.

Business is expanded to Hungarian market.

With subsidiaries in Prague, Brno and Ostrava company is expanding to the Czech Republic.

The first swimming pool dehumidifier is manufactured, and with it, the third business division is established.

Microwell is established as a single business division company, specialising in industrial measurement systems.

HOW WE WORK

INNOVATIVE SOLUTIONS & TECHNOLOGICAL ADVANTAGE

Microwell develops and manufactures well-rounded product assortment with two key specialisation areas - **dehumidification and heating systems**. Through continuous improvement and permanent focus on our customer, our products achieve results that push them in the lead. Ingrained in every step of the development process from research to assembly and final installation, Microwell products display innovation, sophisticated engineering, outstanding quality and craftsmanship. Distinguished as trendsetters, Microwell products are built on our core commitment. We are committed to efficiency.

EFFICIENCY THAT MATTERS

We constantly focus on energy efficiency in each part of our products. Our goal is to be the most energy efficient on the market being able to save money on energy bill for our customers every day. Our products are equipped with features unique to Microwell machines.

LEADING TECHNOLOGY

Based on a review done in 2016 and ISO17025 lab testing of products by various manufacturers across all models, Microwell devices came on top, outperforming the others by up to 30%. Our machines are better, more powerful and of higher quality.*

SMARTER FUNCTIONALITY

Inspired by the pace of progress, all Microwell products are continuously evolving to reach the full potential of ultimate usability, intuitive operation, feature sophistication and compliance to all the most challenging demands and expectations.

APPEALING DESIGN

Microwell product design is recognised in more than 30 countries globally. Over the years products have been awarded several prizes. Thanks to wide make & finish options our products can blend in, stand out or perfectly fit in any environment.

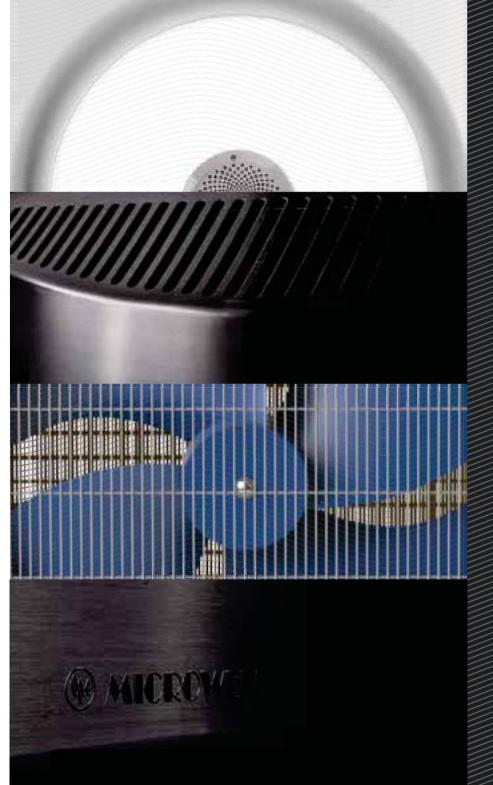

GREATER PRODUCT RANGE

Based on close relationship with customers, Microwell provides functionality and benefits that consumers desire throughout matchless selection of products, their make, design and accessory options. There is no pool or customer that could not be served by a Microwell product.

HIGHER MONEY SAVING

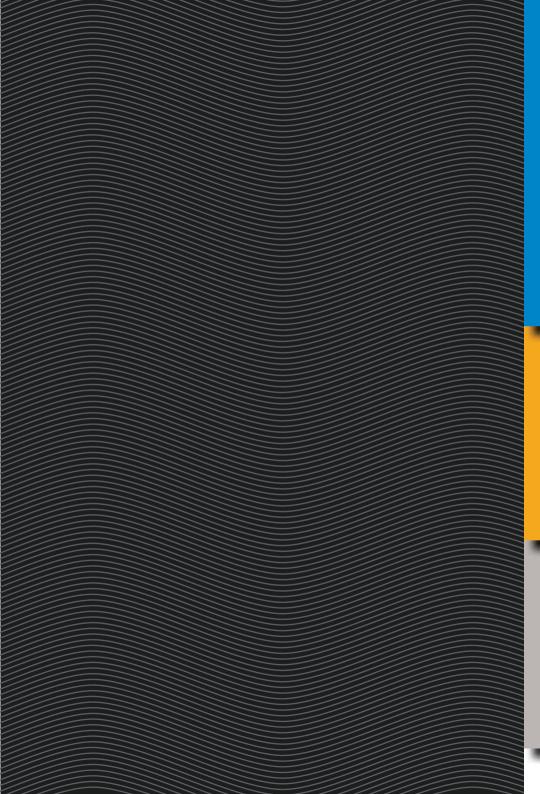

Thanks to outstanding design, leading technology and upto-date concepts, Microwell products achieve up to 36% lower* energy consumption than the others. Our product saves you money every day and helps to keep your bill under control.

We develop intelligent products with inspiring efficiency performance for superior experiences.

NEW

2nd generation

MICROWELL DRY SIREN is the ultimate superstar, the first ceiling swimming pool dehumidifier in the world. Combining all what Microwell technology has to offer, DRY SIREN is an intelligent and visually captivating solution of paramount performance, setting a new tide in the industry.

DRY SIREN OF NEXT GENERATION

THE SECOND GENERATION OF DRY SIREN BRINGS NEW UNIQUE FEATURES:

- Internet connectivity & microSAFETY+ with AI.
- Faster App pairing
- Easier installation •
- New outdoor unit with display
- New generation of motherboard

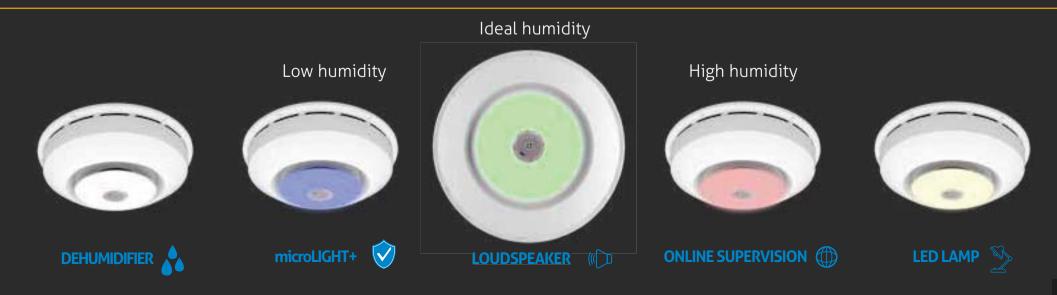

MOTHERBOARD 1ST GENERATION

MOTHERBOARD 2ND GENERATION

5 PRODUCTS IN 1

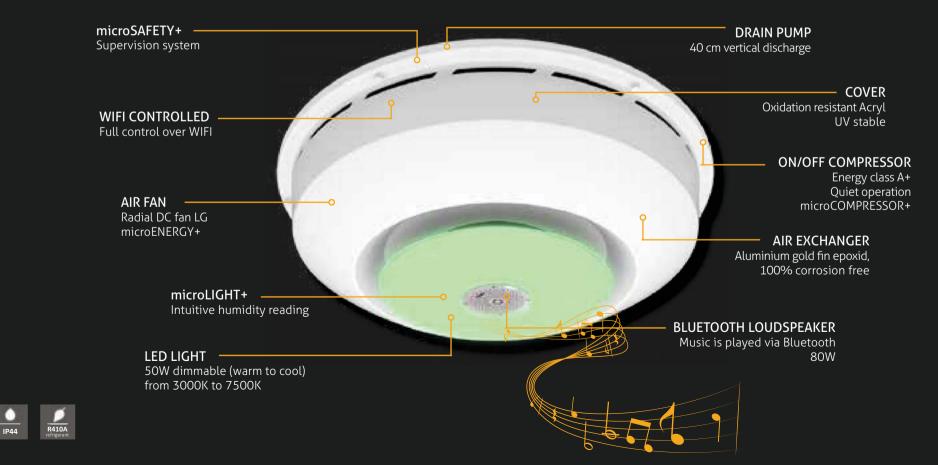

FULL CONTROL

DRY SIREN mobile application allows you to actively take control of dehumidification process, LED lamp, Bluetooth speaker, microLIGHT+ and unit's self-diagnosis. From anywhere in the world, anytime, you are able to observe your unit's current status and air relative humidity and air temperature.

NO NOISE OR VIBRATION

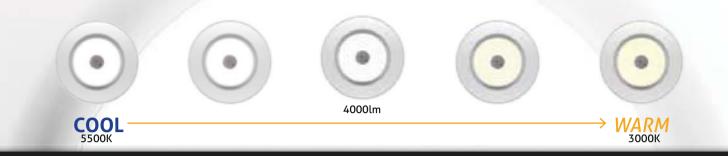

DRY SIREN is a split dehumidifier with the compressor out of pool hall. The only sound you can hear while the unit is running is a DC fan. This is extremely quiet (35dB(A) from 1m).

DRY SIREN HIGHLIGHTS

DRY SIREN 2ND GENERATION

LIGHT TEMPERATURE RANGE

INSTALLATION

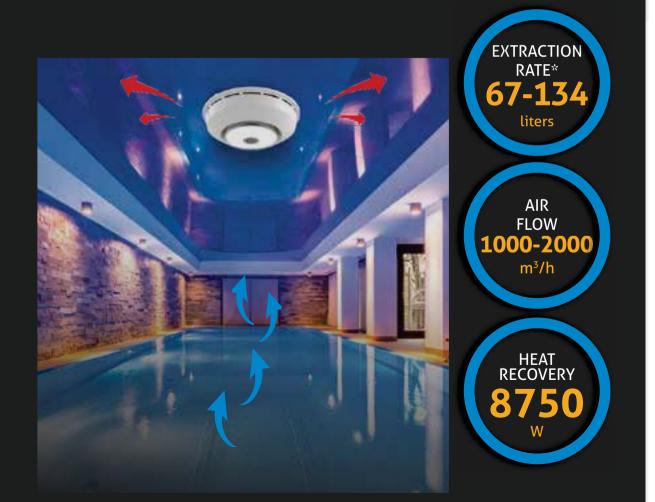

DRY SIREN is a split-dehumidifier with ceiling unit and compressor unit. Ceiling unit is equipped with evaporator, condenser, fan, Bluetooth speaker, LED light and microLIGHT+. Ceiling units are connected to compressor unit with refrigerant copper tubes.

CEILING UNIT PLACEMENT

Ceiling unit is designed to be fixed directly on **concrete** or **wooden** ceiling structure or into lower **gypsun** ceiling using adjustable bar.

CONDENSATE DRAIN

DRY SIREN ceiling unit is equipped with condensation drain pump with 40 cm vertical discharge. The pump is of energy A+ class.

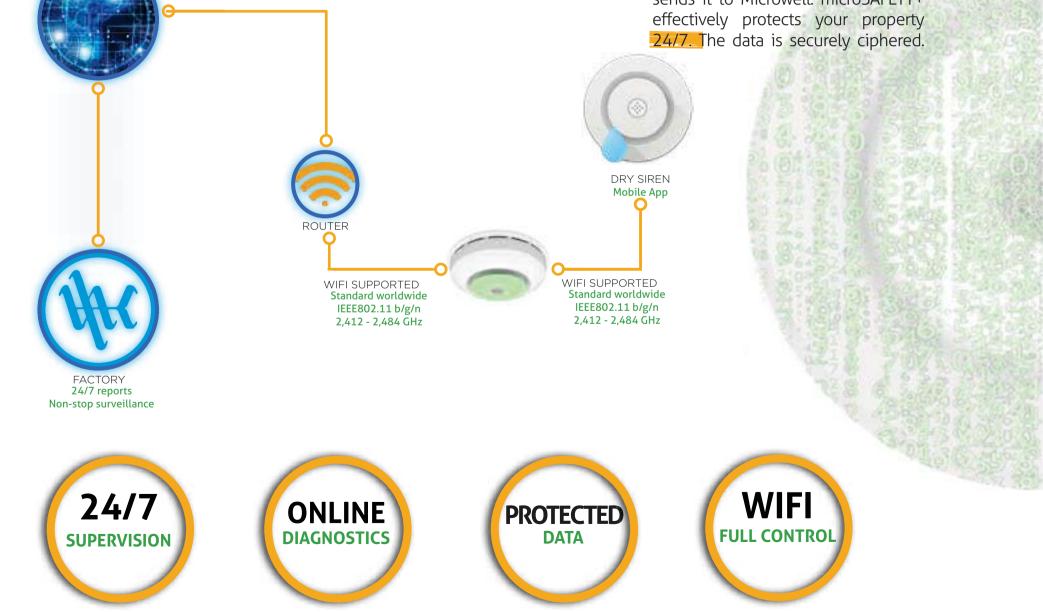

DRY SIREN 2ND GENERATION

EXPERIENCE FUTURE TODAY

INTERNET

microSAFETY+ is a supervision system in DRY SIREN models. The system monitors each DRY SIREN. In the case of a sign of technical problem or possible malfunction, the system creates a report and automatically sends it to Microwell. microSAFETY+ effectively protects your property 24/7. The data is securely ciphered.

SWIMMING POOL DEHUMIDIFIERS

manninninnin

» Dehumidify » Heat » Ventilate with one device

MICROWELL DRY

Microwell dehumidifiers solve humidity problems and maintain healthy environment by removing condensation and vapor.

HEAT RECOVERY

Every dehumidifier is built on heat recovery principle providing up to **3.5 times** more energy than it consumes.

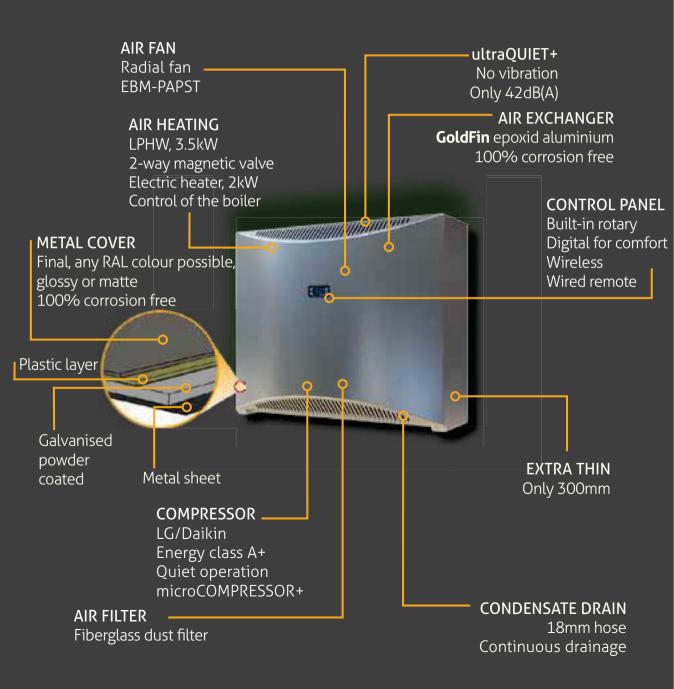

Specially developed dehumidifiers for residential and hotel pools, spa and jacuzzi.

DRY DEHUMIDIFIERS ARE INSTALLED IN:

- Swimming Pools
- Spas
- Hotels and Wellnesses
- Hot tubs and Jacuzzis
- Fitness clubs
- Gyms
- Museums and archives
- Warehouses
- Drying rooms for laundry, breweries
- Military storages
- Bakeries
- Wine cellars

DEHUMIDIFIER HIGHLIGHTS

ATRACTIVENESS TAILORED

Technologically advanced DRY swimming pool dehumidifiers with their trendy appearance are made to satisfy high expectations of pool owners. Offering an extensive selection of cover materials, accessories and colours.

PLENTY OF OPTIONS

Microwell DRY swimming pool dehumidifiers are designed with the customer in mind. Built with best materials and carefully executed processes on every step of product development. For customer's satisfaction, we offer consultations and widest tailoring options.

WIDE COLORS OPTIONS

Enjoy the experience of a custom-made piece of the art dehumidifier in your pool or in your customer's pool. Why would you have only a box shaped machine placed in your swimming pool hall if you can have a piece of furniture designed according to your own taste and needs? Microwell offers the widest range of colors on the market.

We normally have 200+ colors in stock. Colouring based on our customers' own choice is free of charge and can be done typically within 48 hours. You can specify your desired color according to international RAL color coding.

Our Innovation FRESH AIR SUPPLY

MICROWELL additional ventilation

Each Microwell dehumidifier has fresh air supply possibility. The air inlet is located under the condenser, that way the incoming fresh air is effectively heated at no cost thanks to heat recovery.

FRESH AIR ventilation

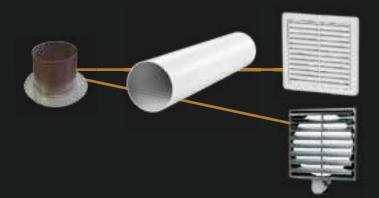

EXHAUST ventilation set

Includes: Small axial extract fan, Backdraft shutters, Connection - 3pcs, Plastic external louver, Plastic circular hose

FRESH AIR ventilation set

Includes: Fresh air metal extension for connection to dehumidifier, Plastic external louver / Electric plastic back draft louvre shutter, Plastic circular hose

HEALTH & PROPERTY protection

Real time measurement of humidity in LED color scale

Microwell microLIGHT+ is a unique LED technology, designed for accurate measurement and intuitive reading of humidity level present in indoor environment. Working on the principle of relative humidity reading, microLIGHT+ uses LED light to project color instead of a measured figure. The color moves in continuous gradient.

- Blue LED light indicates a low level of relative humidity.
- Green LED light marks an ideal range of relative humidity.
- Red LED light indicates a high level of relative humidity.

- Quickly and accurately measures the current relative humidity in any indoor environment.
- Automatically reflects relative humidity by changing the color gradient between blue, green and red color.
- Uses multi-LED light system to transmit gathered information.
- Notifies the level of relative microclimate humidity in real time.

without microLIGHT+

microLIGHT+ applications

• microLIGHT+

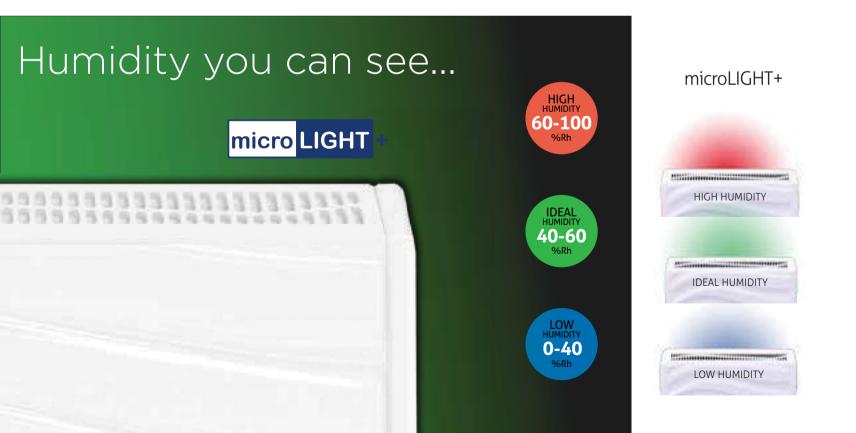

Accessory for all MICROWELL dehumidifiers operation temperature range: 0°C ... +60°C

• microLIGHT+ LAMP

Freestanding table lamp, that can be placed anywhere in the room.

microSTEAM+

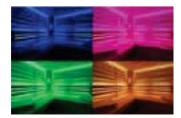

LED humidistat designed for ceilings of the swimming pool halls or wellnesses and saunas. operation temperature range: 0°C ... +120°C Excessive humidity in living areas has a damaging effect on personal health, and it also affects living conditions at home. Moisture in the form of vapour condensation and general dampness is the main cause for the growth of mould, bacteria and bad odour. Prolonged exposure has a bad effect on personal heath and general quality of life.

microSTEAM+

REMOTE WIRELESS HUMIDISTAT & THERMOSTAT

REMOTE WIRED HUMIDISTAT

EASY 300 is a remote wireless device for monitoring and controlling humidity and air temperature.

- <u>30 meters</u> distance in buildings
- 100 meters outdoor
- humidistat & thermostat
- golden24 carat galvanized contacts

HYG 6001 is a remote wired device for monitoring and controlling of humidity. The unit is mounted on any surface and at any distance from a dehumidifier.
range 30% to 100% RH

BUILT-IN DIGITAL HUMIDISTAT & THERMOSTAT

Built-in digital humidistat ϑ thermostat is a convenient, accurate solution for temperature and humidity control. It is supplied by standard to Metal, Silver ϑ Duct models

- installation on dehumidifier
- simple operation
- range **5%** to **100% RH**

COMPATIBILITY All DRY range

COMPATIBILITY All DRY range

HIGH TEMP SPA SET UP TO 42°C

ANTIFREEZE SET FROM +15°C

LOW TEMP SET FROM +5°C

Thermostatic expansion valve, Spa set, prevents the overheating, and allows the dehumidifier to work effectively in ambient air temperature up to 42°C. This is effective mainly in spa and sauna areas.

COMPATIBILITY All DRY 300 and DRY 500 models

Outdoor pool set is primarly designed for outdoor pools with cover. Thanks to antifreeze thermostat, it allows a dehumidifier to work effectively in ambient temperatures down to +15°C. Outdoor pool set can be used with a Spa set to create the widest operational temperature range from +15°C to +42°C. Microwell dehumidifiers can be equipped with a hot gas defrost function to provide with an effective humidity control by ambient air temperatures from +5°C. Hot gas defrost is used in permanent low air temperature applications.

COMPATIBILITY All DRY range

COMPATIBILITY All DRY 300 and DRY 500 models

AIR HEATING WATER & ELECTRICAL UP TO 7 KW

OUTDOOR INSTALLATION

AIR FILTER

Each Microwell dehumidifier can be equipped with an additional air heating.

- 3 options of connection
- Low Pressure Hot Water (LPHW) up to 7kW
- Electrical heater up to 3kW

BACK CARLEN AND CONTRACTOR AND A STREET

Sometimes a specific set of pool parameters require a dehumidifier unit to be installed in exterior. Microwell offers a complete solution with 40mm aluminum covered insulation, condensate tray defrost and winter module allowing operations down to -15°C.

Each Microwell dehumidifier can be equipped with an effective air filter on demand. The structure is made from fiberglass supported on an aluminum frame categories:

WIFI SMART CONTROL

WINTER PACKAGE

PROTECTION COVER

Microwel HP can be upgraded with a WIFI module. This includes small WIFI box enabling internet connection through Android/iOS App

- to control your swimming pool 24/7 from anywhere in the world,
- be notified of an emergency situation,
- have constant ability to check the conditions of your pool.

COMPATIBILITY All HP range except HP 1700 Winter package prevents heat pumps from any damage during extremely cold weather. Winter module helps to extend operational air temperature range down to -15°C.

The package includes:

- Condensate tray defrost
- Heat exchanger frost protection
- Winter module

COMPATIBILITY All HP range Applied in a non-operation period, protection cover ensures protection of the heat pump during all seasons.

COMPATIBILITY All HP range

SELF-CLEANING COLOR

GOLD FIN

CONTROL DISPLAY PLACEMENT

Self-cleaning color is innovation by Microwell. The final finish is a special paint made on the basis of years of experience and the latest knowledge in the field of nanotechnology. Color has microscopic film on the surface of the heat pump, and washes away any dust with the first rain. Standard on all Microwell units, our Gold Fin process is an anti-corrosion coating that forms a protective shield so the unit can withstand virtually any environment (sea side, acid rain, chlorine, etc.)

Microwell offers <u>3 installation option</u>s of heat pump control panel:

- Outside (on the unit)
- Remote (30 m)
- Wall

HIGH-CAPACITY POOL DEHUMIDIFIERS

from **700** to **4500 m³/h**

from 700 to 9500 m³/h

Using cross flow heat exchanger, WRC series achieves as high as 75% heat recovery. Available in strong 7 sizes from

700m³/h to massive 9.500m³/h, units are suitable for effective and economy humidity control in commercial projects.

WRC SERIES

from 3000 to 9500 m³/h

RECUPERATIVE DESIGN

Recuperative models (WRC and WRG) use exclusively exterior air to control the humidity. Their efficiency tops 75%. Low Pressure Hot Water or electrical heater is used to balance the heat losses.

MATCHLESS ACCESSORY OPTIONS

All three WRC, WRG and WRPC series are equipped with the widest range of accessories to complete their flexibility and response to onsite demands.

WRG SERIES

Heat recovery up to magnificent 95% throughout counter flow recuperative heat exchanger places WRG series on the top of recuperative dehumidifiers. Available in 5 sizes from 700m³/h to practical 4.500m³/h, the models can serve smaller commercial projects with focus on economy.

from 4 to 60 kg/h - up to 160 m²

from 4 to 60 kg/h - up to 200 m²

WRPC SERIES

Combining 2 the most efficient ways of humidity control, the WRPC models achieve 100% heat recovery throughout using recuperative and heat pump principle. Built in 4 sizes from 3.000m³/h to 9.500m³/h, the units are applied in large scale commercial projects where performance is the key.

from 17 to 60 kg/h - up to 200 m²

WATCH VIDEO & LEARN MORE

OMAX HEAT PUMP TESTER MOBILE POOL SPECIALIST

OPERATION MEASUREMENT

After Omax Tester is connected to swimming pool waterway between heat pump and outlet and water flows through the device, it begins measuring heat pump's performance. In only a few minutes it delivers detailed measurement, and reads off six different measurements:

Coefficient of performance (COP), Energy efficiency ratio (EER), true heating or cooling output (kW), heat pump power consumption, water temperature and water flow in m³/h.

PERFORMANCE OPTIMIZATION

With Qmax Tester it is possible to adjust and optimise the water flow for a particular heat pump in real time. Qmax Tester can be applied to brand-new or existing installations, increasing the actual performance of a heat pump by up to 30% without the change in power consumption.

Qmax Heat pump TESTER. Setting the quality of pool performance.

NO MORE FAI SE DATA

One of the most problematic aspects of today's industry are misleading performance results. Heating outputs and COPs are unreliably increased by up to 40%. This harms both the consumer and the heat pump's image. To disclose false claims and to show real data. Microwell has designed Qmax Tester.

TRUE RESULTS

Qmax is connected to water way between the heat pump and the pool. As the water flows through the device, Qmax performs detailed testing, displaying all technical data and performs full optimisation of the heat pump. In no more than 15 minutes!

INDUSTRIAL DEHUMIDIFIERS

HUMIDITY OPERATING 30-95 RANGE CONSUMPTION 1.4 kW

°C

_____ IP44

3 SIZES FOR COMPLETE HUMIDITY EXTRACTION

Microwell industrial dehumidifiers are high-performance mobile appliances designed for high volume moisture extraction. With capacities of **40**, **90** and **120** litres per day they are well suited for any application. Often multiple units can be combined in a single application to provide massive yet very mobile drying. Additional electrical heater can be included with a dehumidifier to help speed up the drying process. As the applications are often harsh, all machines are extremely durable.

FIT FOR HARSH TEMPERATURES

Equipped with a built-in electrical heating element, which ensures defrosting of the exchanger, Microwell industrial dehumidifiers are capable of operating at temperatures from 0°C to 35°C in any indoor area.

APPLICATION OPTIONS

New construction sites, humid, drying up buildings, non-heated rooms, cellars, warehouses, switch rooms, filling stations, sports halls, garages, buildings flooded by water after firefighting to avoid corrosion, etc.

T90 / TE90

— up to **90 l/day**

MUSEUM DEHUMIDIFIERS

DISCREET DESIGN FOR ENCLOSED EXHIBITION ENVIRONMENT

DRY GALLERY 300/400 is an elegant and mobile solution for small exhibition spaces. With standard glossy white cabinet-like housing on wheels, it can be easily and nonintrusively placed in any environment. Specially adapted to work in exhibition spaces, the unit is especially quiet and has low vibration levels. Each unit is equipped with 20-liter condensation tank and continuous drainage.

APPLICATION VARIETY

Museum properties, dehumidification of galleries also offices, storage rooms, archives, warehouses, etc.

up to **48 l/day**

micro +

micro CONTROL +

Technology of the most precise and most economy humidity control. It is applied for ducted types of dehumidifiers. microCONTROL+ shortens the problem solving time and overall contributes to healthier environment sooner and more effective than any other dehumidifier.

Microwell machines are designed as plug-n-play devices. Typically, installation can be comfortably performed by a single technician or pool owner himself.

micro ECONOMY +

Technology of a circulation pump control. Microwell swimming pool heat pump with microECONOMY+ ensures heating of your pool sooner and cheaper than any other swimming pool heat pump.

anti FREEZE +

Microwell unique protection to

avoid damage of your property

or the heat pump in subzero

temperatures.

Dehumidifiers marked with microENERGY+ are equipped solely with the most energy saving DC fans. These bring the necessary performance, quiet operations and save costs on energy bill every day.

Special vibration eliminating silent blocks are by standard included with all Microwell heat pumps.

micro COMPRESSOR +

Special compressors integrated with maximally finetuned working point for the dehumidifiers and for the heat pumps achieving highest performance at lowest energy consumption.

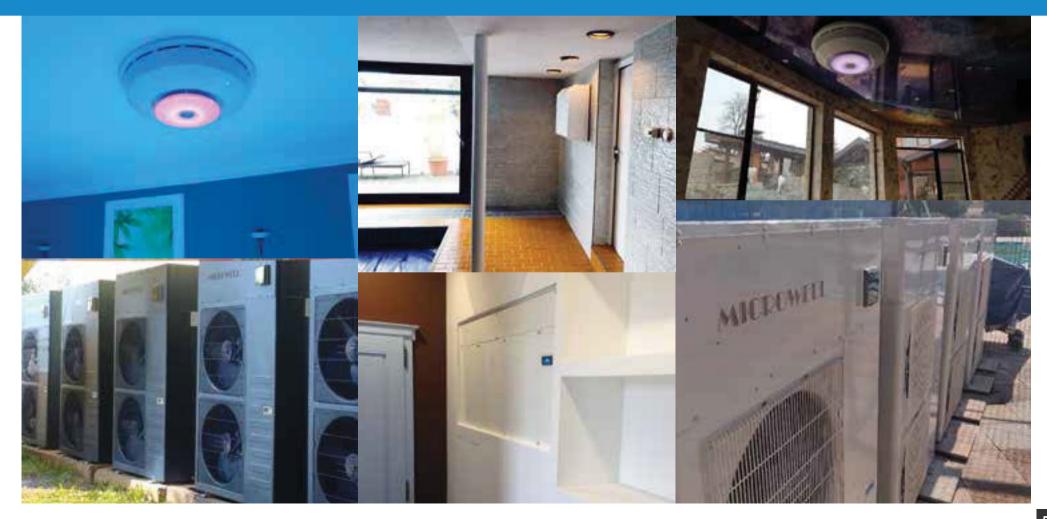

This mark stands for exceptional silence of the unit. 42 dB (A) at 1m distance for dehumidifiers 30 dB (A) at 10m distance for heat pumps

microSAFETY +

microSAFETY+ is a supervision system in DRY SIREN models. The system monitors each DRY SIREN. In the case of a sign of technical problem or possible malfunction, the system creates a report and automatically sends it to Microwell. microSAFETY+ effectively protects your property 24/7. The data is securely ciphered.

Microwell is European designer and manufacturer of dehumidification solutions and heating systems from Slovakia. From its foundation Microwell is firmly present on the global market, where it is recognised as a leading expert for swimming pool dehumidification and heating solutions.

With distributors and partners in 30+ countries across Europe, Russia, Middle East and North Africa. Microwell capitalises the flexibility and strategic position only to explore new opportunities leading to new intelligent products.

By fostering innovation, Microwell remains true to its core company value and commitment.

Committed to efficiency.
