

Airwell

Just feel well

**FLOWLOGIC
VRF RANGE**

Variable Refrigerant Flow
solutions

LAURENT ROEGEL CEO AIRWELL GROUP

Optimizing our energy consumption, promoting solar energy to preserve our natural resources, reinventing consumer practices, cultivating the comfort of every interior... many are thinking about it. At Airwell, we are committed to this for the well-being of all and the environment..

As early as 1947, when Airwell was founded, we have demonstrated our ability to anticipate, innovate, and offer solutions that provide better thermal comfort for all of our customers. This is why we understood very early on that we had to rethink our relationship with Energy.

Just feel well

*Tomorrow's world must be built around a single principle: Serenity.
Energy solutions must be simple, intuitive in management and use, and completely reliable.*

Just feel green

They should allow a reduction in our energy consumption to reduce the ecological and economic impact of housing.

Just feel smart

They have the obligation to integrate an artificial intelligence capable of creating Energy optimization and preventive maintenance scenarios.

With Airwell, the revolution is underway.

A revolution so that each consumer gains in better living, so that the planet is spared and so that all of our distributors and installers, like you, have the best tools in response to the challenges of today and tomorrow.

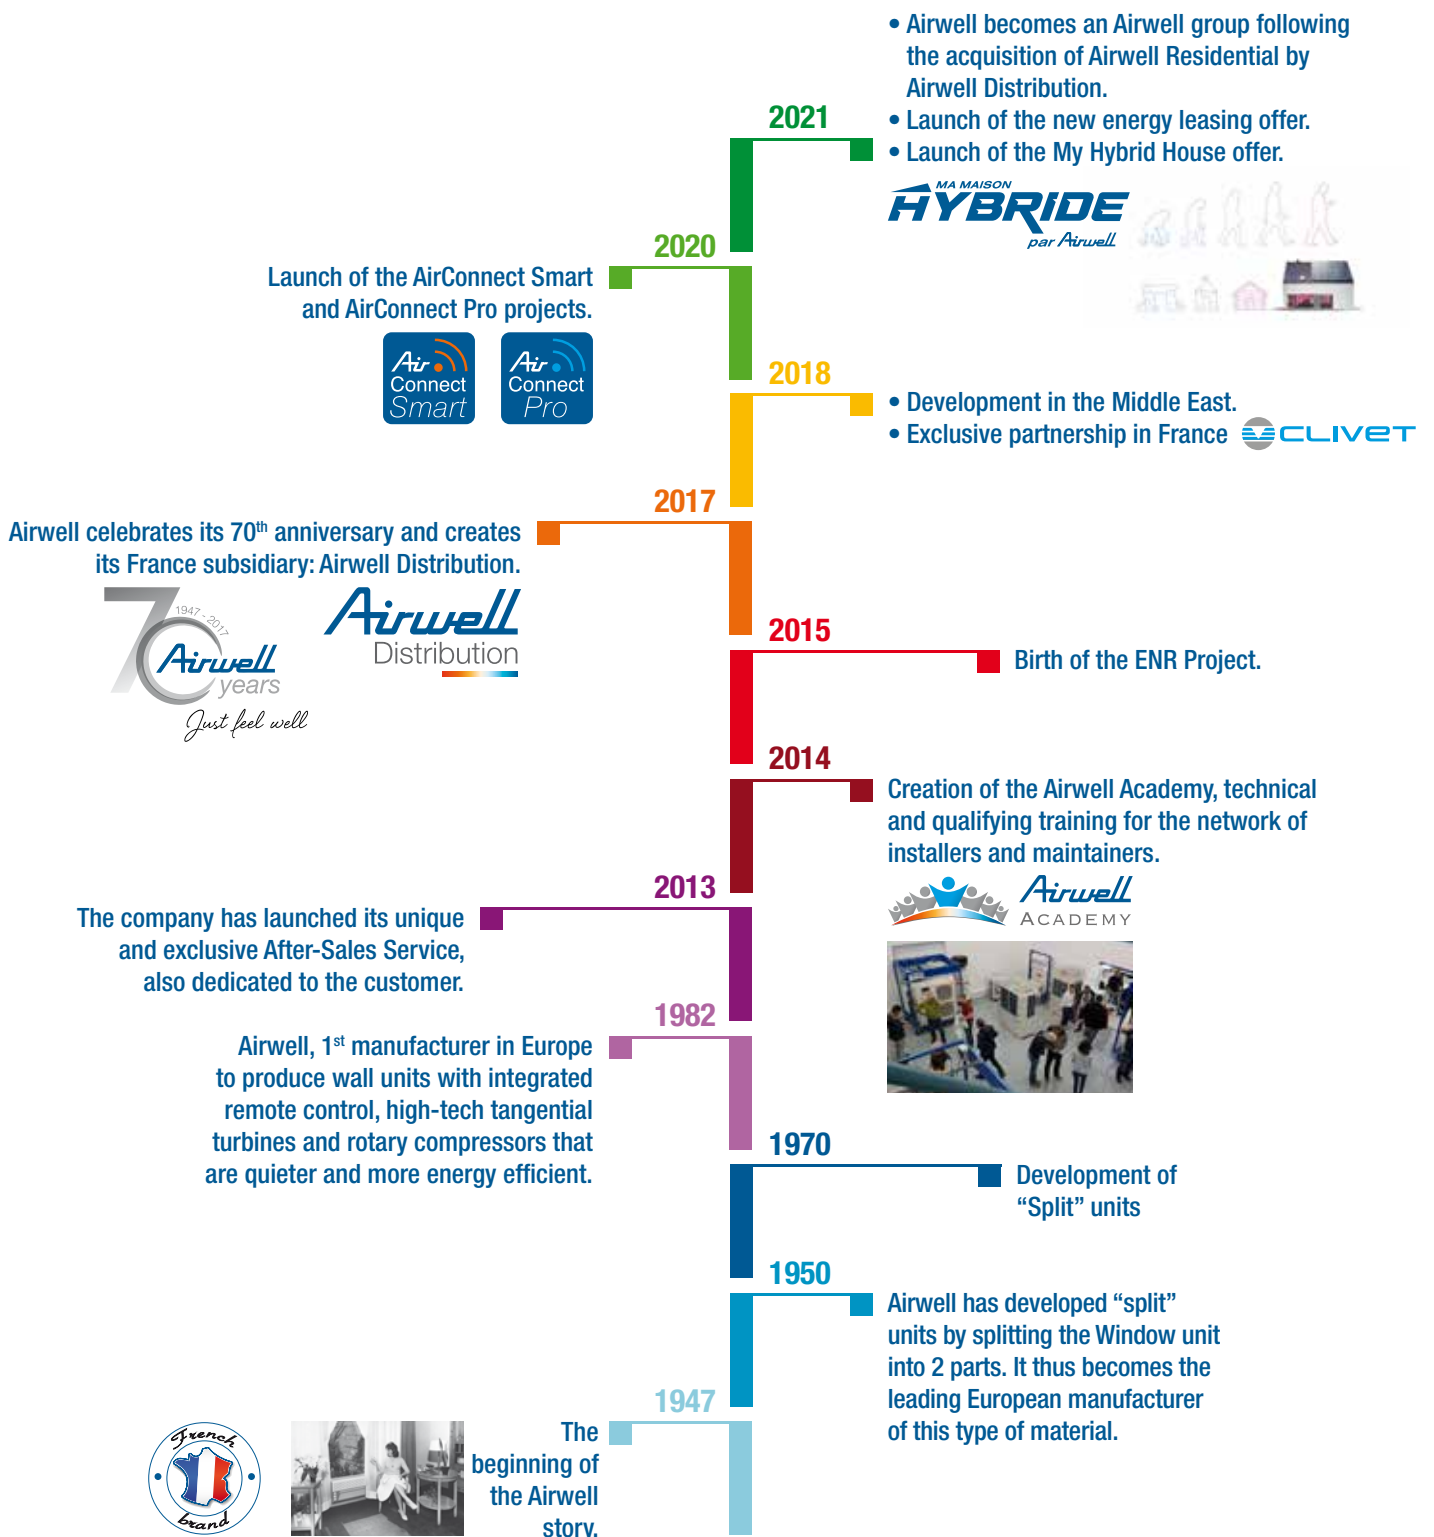

And it's all done with you. *As Airwell partners, you are guaranteed to be supported and trained in market developments so that you can provide your customers with innovative and competitive responses, tailored to their demands and our mission.*

*Just feel Well, feel Green, feel Smart with Airwell.
Laurent Roegel, CEO Airwell Group*

History

Your french expert

FOR 75 YEARS

OUR PRODUCTS

- Air/water range
- Air/air range
- Water condensing range
- Tertiary and industrial range
- Solar range

OUR CERTIFICATIONS

- AIRWELL participates in the ECP programme for AC1. Check ongoing validity of certificate:

www.eurovent-certification.com

- Company meeting the **ISO 9001** standard

IN FEW NUMBERS

- 1st manufacturer to produce the Window
- More than 75 years of experience
- Present in 80 countries
- More than 6,500 references in stock

WHO ARE WE?

A French brand of reference among professionals.

French expert and creator of climate and thermal solutions for more than 70 years, Airwell's mission is to create and cultivate well-being. A vision for the future. Here is how the Airwell company was born in 1947. With this crazy idea of bringing from the United States innovative solutions that did not yet exist in Europe: air conditioning.

Today, innovation is more than ever at the heart of Airwell as we have become leaders in creating thermal and climate solutions. A deeply human innovation, listening to consumers. Like the family spirit that defines Airwell, based on benevolence, while respecting everyone's expectations.

Optimizing our energy consumption, favoring solar energy to preserve our natural resources, reinventing consumer practices to limit our environmental footprint, cultivating the comfort of every interior... At Airwell, we are committed to this for the well-being of all and of the environment.

What was for us only an ambition has become our mission.

OUR ENGAGEMENTS

SERVICE, OUR PRIORITY

- Design of unique solutions
- Our DNA: partnership
- Help in the realization of your projects
- Local and remote technical support

FRENCH QUALITY AND EXPERTISE

- Historic French brand 
- Innovative and competitive solutions
- Wide range of products to adapt to each need.

Smart control systems

INNOVATIONS

Just feel smart

APPS	Page
AirConnect Smart App	8
AirConnect Pro App	10

CONTROL YOUR VRF SYSTEM FROM ANYWHERE

The FlowLogic VRF system can be remotely controlled by the intelligent WiFi module and controlled by the AirConnect application.

2
Pair all your indoor units at once thanks to Airwell WiFi Bus Control technology.

1
Control your Airwell VRF air conditioning system wherever you are, up to 4 VRF systems and 64 indoor units.

3
Multi-site management: quick and easy to use for managing several sites equipped with Airwell VRF from your smartphone.

4
Create your own regulation for greater comfort, maximum efficiency and energy savings with the automation and scenario platform.

5
Add a multitude of connected objects.

To download the application, it's simple: just scan the QR code.

Smart WiFi module

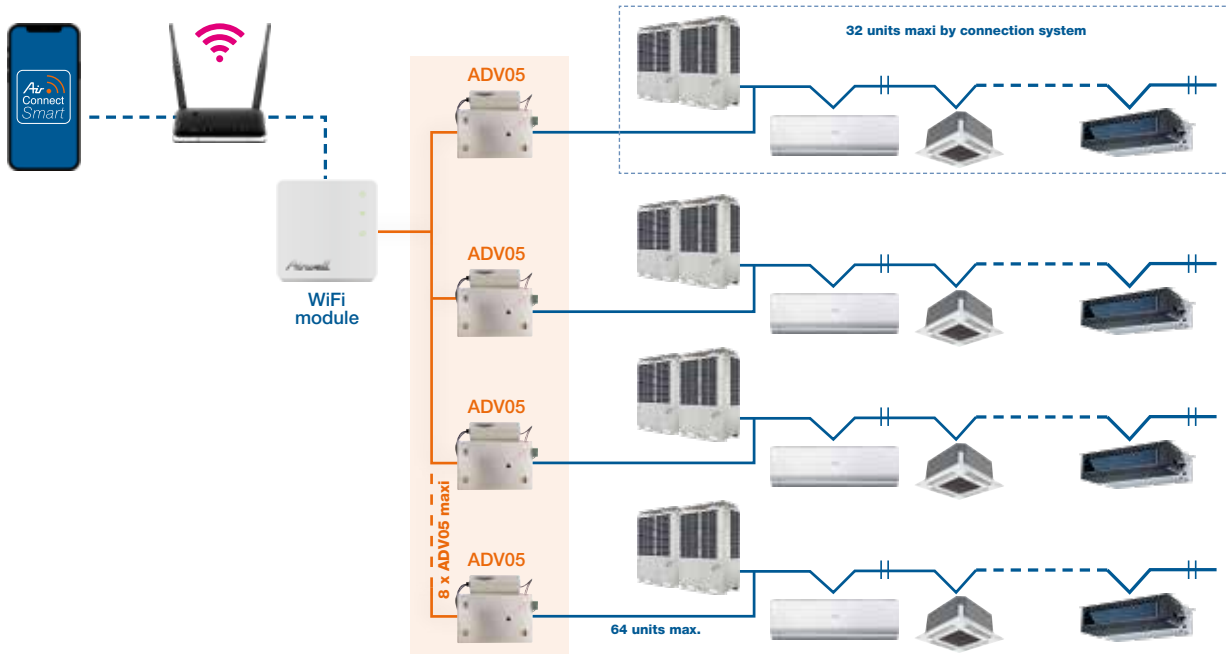

Part number 7ACEL1869

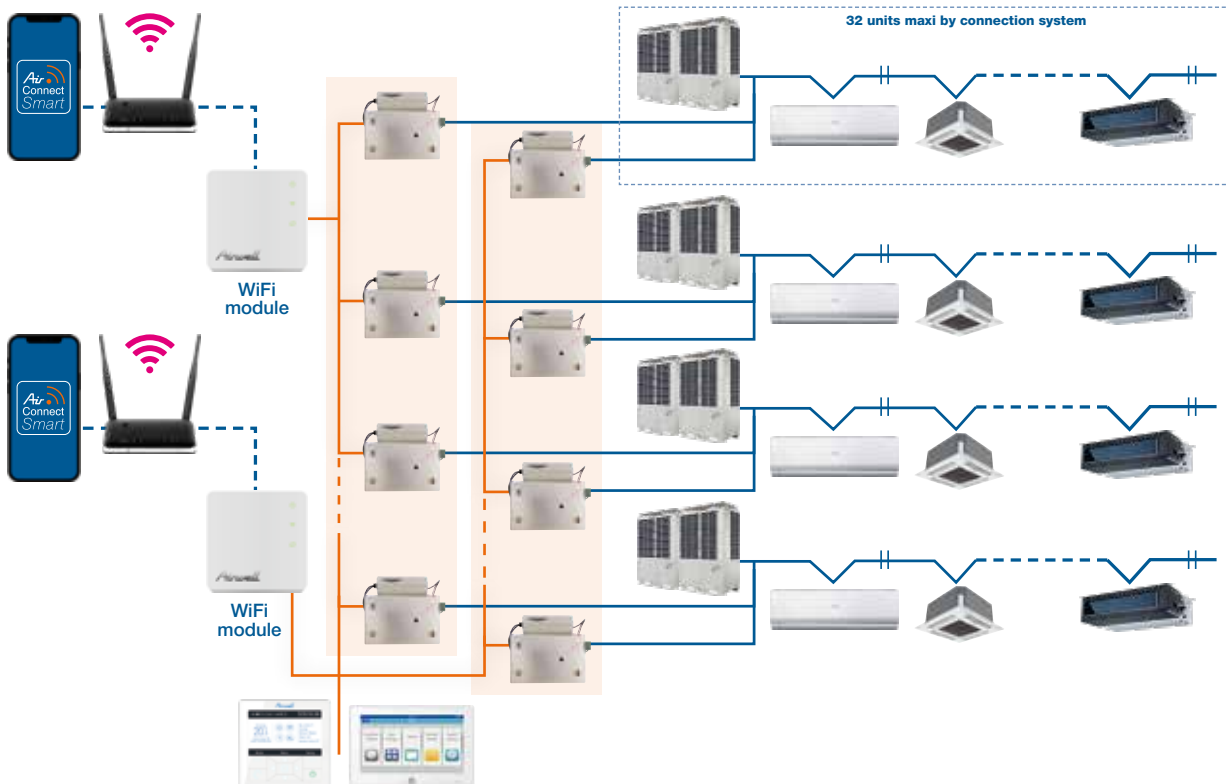

- Module dimension: 86x86x12 mm
- Compatible Models: Mini FlowLogic

INSTALLATION METHOD

Thanks to **Airwell WiFi Bus Control**, a single pairing to connect all your indoor units.

→ The Airwell VRF can be associated with both the central controller (RWV06, RWV09) and the AirConnect Smart WiFi module.

GLOBAL SOLUTION FOR THE **CONTROL** AND **PREVENTIVE MAINTENANCE** OF **VRF** INSTALLATIONS accessible on smartphone, tablet* or computer

Optimal thermal comfort

Entrust your thermal comfort to AirConnectPro, in order to be free from technical constraints and operational hazards.

Visualization of your VRF fleet

View the settings of all your VRF spread across a city, region, country or around the world.

History management

Access the complete operating history (fluidic and electrical) of each indoor and outdoor unit from the day of commissioning. Make comparisons between periods or between sites.

Preventive maintenance

Easily create your anticipation rules to prevent any problems or unexpected shutdown of your systems.

www.airconnectpro.com

Alert management

Be alerted on any slightest drift! Alerts, anomalies can be sent directly to your technicians depending on the level of technicality or their geographical proximity.

Creation of technical diagnostics

Carry out your technical diagnostics in no time and offer a technical service of unparalleled quality and speed, while optimizing the work of onsite technicians.

* For the Control App.

AIRCONNECT PRO IS A COMPLETE SOLUTION THAT OFFERS 3 LEVELS OF SERVICE:

- **Control App:** control of indoor units
- **Service App:** diagnostic and preventive maintenance
- **Management App:** site management, energy metering and optimization

CONTROL APP (control of indoor units)	<p>Unique solution for remote control of indoor units</p> <ul style="list-style-type: none"> → Management of modes, setpoint temperatures, fan speed. → “Weekly schedule” programming without rule limitation. → Control zones creation allowing energy savings.
SERVICE APP (diagnosis and preventive maintenance)	<p>The ONLY preventive remote maintenance solution on the market: Prevent a breakdown before it happens!</p> <ul style="list-style-type: none"> → Remote visualization of all parameters of the installations. → VRF and diagnosis in one click. → Recording of all the data allowing a complete history of history of operation. → Management and follow-up of alerts to designated technicians.
MANAGEMENT APP (metering and energy optimization) (in développement)	<p>The most reliable and accurate energy metering solution on the market. Thanks to the Modbus MID meter, it allows the consumption distribution per indoor unit according to its operating parameters.</p> <ul style="list-style-type: none"> → Division of global consumption by indoor unit or by zone. → Energy audit of the installation allowing energy savings. → Comparison of consumptions by system or by site in order to optimize the operation of the machines and reduce energy costs.

PRODUCT & SERVICE REFERENCES	1 st year pack	From the 2 nd year
AIRCONNECT PRO CLOUD BOX	<ul style="list-style-type: none"> • Cloud Box AirConnect Pro • Lifetime CONTROL APP. • 1 year SERVICE APP license for the maintenance solution. 	<ul style="list-style-type: none"> • Automatic renewal of the license of SERVICE APP. • In the event of termination of the SERVICE APP, the CONTROL APP application remains usable for life.
LIFETIME CONTROL APP LICENSE PER CLOUD BOX	SO3299999	
SERVICE APP LICENSE PER SYSTEM & PER YEAR	SO30120xx	xx = system capacity

●..... **SIMPLE DATA COLLECTION WITH THE AIRCONNECT PRO CLOUD BOX**
Up to 2 VRF systems and 128 indoor units managed by one AirConnect Pro Box.

Why choosing a VRF system?

■ One system for multiple applications

Shopping centers

Villas

Hostels

Offices

- Cooling down to -15°C outside (except size 8)
- All seasons
- Instant change of mode (heating/cooling)
- Scalable system
- All indoor unit types

HIGH WALL HBV

CASSETTE 600x600 CBV

CASSETTE 360° CFV

FLOOR CEILING FAV

DUCTED LOW STATIC PRESSURE DDV

DUCTED MEDIUM STATIC PRESSURE DBV

DUCTED HIGH STATIC PRESSURE DCV

CONSOLE EAV

AHU CONNECTION KIT

■ Easy installation

- Professional selection software
- Ideal solution for refurbishment (easy installation also in inhabited places)

Why choosing an Airwell VRF system?

- Wide range of power: from 3 to 72 HP (from 8 to 204 kW)
- Silent system
- Compact solution: small footprint
- High performance: COP until 4.5
- Seasonal operating limits: - heating: 197%
- cooling: 337%
- Eurovent certified

Powerfull system

USE HIGH EFFICIENCY DC INVERTER SCROLL COMPRESSOR, HIGH EFFICIENCY, LOW NOISE

The Scroll compressor used in the Airwell FlowLogic III range of VRF has been selected for its energy efficiency and high reliability. The Scroll compressor's spiro-orbital rotation mechanism reduces frictional pressure drop and ensures optimum efficiency over the entire frequency range.

HIGH EFFICIENCY DC FAN MOTOR

The speed of wide range DC fan motor can be adjusted from 0 to 1000 tr/min. Compared to conventional AC motors, a DC fan motor offers greater operating efficiency, especially during low speed rotation. The efficiency could be 90%.

HEAT EXCHANGER ADOPTS THE SUBCOOLING TECHNOLOGY: HIGH EFFICIENCY

- The system is cooled with less refrigerant.
- Improve subcooling degree of refrigerant.
- Avoid energy loss due to refrigerant flash evaporating when it goes through PMV.
- W-model Ø8 inner grooved pipe.
- Hydrophilic aluminium coil fin, it will increase efficiency of heat exchange by 5%.

Increase the efficiency of system

- **Increase cooling power by 6%.**
- **Reduce refrigerant circulation amounts.**

PRECISE CONTROL

PID control adjusts the output of the compressor and the open degree of EEV, balances the indoor refrigerant flow, realizes the linear output, creates a comfortable environment. The temperature can be controlled precisely.

CERTIFICATION

AIRWELL participates in the ECP programme for AC1.
Check ongoing validity of certificate:
www.eurovent-certification.com

* models so marked are not Eurovent certified, except YCV080.

THE «SUSTAINABLE DEVELOPMENT»

→ Low consumption and optimized regulation for greater energy savings.

THE «USER»

- Mode locking.
- Centralised management.

THE «INSTALLER»

- Up to 300 m of refrigeration network and 50 m of height difference.
- Access to all parameters via the HMI for easier maintenance.

THE «TECHNOLOGY»

- Up to 16 indoor units, performance certified by Eurovent* (8,10,12 HP).
- Airconnect Pro: remote maintenance and management option (see page 10).

High efficiency DC fan motor:
DC fan motor with stepless inverter control, efficiency increased by 45% compared with AC motor and power input.

High efficiency condenser:
Ø8 inner grooved pipe; hydrophilic corrugated fissure fin.

Large diameter fan:
570 mm big diameter axial flow fan; zigzag design, reduce airflow disturbance, air volume is bigger, the noise is lower.

10-12 HP

Vector inverter control:
180 degrees sine wave vector control, 64-bit operation; high precision control, to achieve high efficiency and lower noise.

Double pressure sensor:
equipped with high and low voltage; pressure double sensors; accurate pressure control, the system runs more smoothly, and is more energy efficient.

Twin rotary DCI compressor:
high chamber DC Inverter twin rotary compressor; small vibration, low noise, high energy efficiency.

HIGH MODULARITY: LONG PIPE LENGTH, HIGH HEIGHT DROP

- Floor area optimized for all the product range (same footprint for all modules: 0.97 m²)
- One of the smallest footprints on the market.

- Full DC Inverter
- 2 x Full DC Inverter.

> 0.97 m²

■ High static pressure outdoor unit:
82 Pa, long air duct

Hidden solution:
installation of
outdoor unit in a
technical room

■ Wide operation range

→ **Specific design:**

- Double EEV.
- Two-piece condenser.
- Independent electrical box.

→ **Reliability/Maintenance:**

- Compressor double protection: two pressure sensors.
- Double oil temperature sensor.
- Large volume gas-liquid separator (26L) + liquid storage tank (10L).
- Two floor structure (no air bypass during maintenance): efficient measures.

→ **Fan:**

- Optimized fan to reduce air vibration.
- DC fan to optimize efficiency.
- 82 Pa static pressure.

■ **Specific oil return**

- Magnetic valve.
- If the compressor operates at low frequency, oil return is only with capillary.
- If the compressor operates at higher frequency, PCB controls magnetic valve to improve oil return.

COMPATIBLE

+ PRODUCTS

- Water condensation
- Co-axial heat exchangers
- Compact design
- Quiet

RWV06
(optional)

RWV09
(optional)

FEATURES

TECHNOLOGY:

DC INVERTER

INSTALLER FUNCTIONS:

SELF DIAGNOSTIC

BMS COMPATIBLE

SERVICE MONITOR TOOL

THE « SUSTAINABLE DEVELOPMENT »

- High energy efficiency (COP > 6).
- Energy recovery from water loops.

THE « USER »

- 100% indoor application.
- Practical and discreet solution.

THE « INSTALLER »

- Stacked installation is possible.
- Up to 300 m of refrigeration network and 50 m height difference.

THE « TECHNOLOGY »

- Up to 19 indoor units.
- Outside temperature does not affect performance.
- Airconnect Pro: remote maintenance and management option (see page 10).

ACCESSORIES

Accessory	Part nb.	Ref.	Picture	Function	Comment
Gather pipe kit for 2 outdoor groups	7ACFHH013	TBS20		Refrigerant gathering	For 2 outdoor groups
Gather pipe kit for 3 outdoor groups	7ACFHH014	TBS30		Refrigerant gathering	For 3 outdoor groups
Manifold pipe (gas + liquid)	7ACFHH001	TAU335		Refrigerant gathering	33.5kW > Total IDU power
	7ACFHH002	TAU506		Refrigerant gathering	33.5kW ≤ Total IDU power < 50.6kW
	7ACFHH003	TAU730		Refrigerant gathering	50.6kW ≤ Total IDU power < 73kW
	7ACFHH004	TAU1350		Refrigerant gathering	73kW ≤ Total IDU power < 135kW
Central controller gateway and ModBus/RTU	7ACELH027	ADV05		RWV06 and RWV08 adaptor and ModBus/RTU gateway	
Maintenance tool	7ACELH014	TD02		Working parameters monitoring and recording tool	
Smart WiFi module	7ACEL1869	-		Remote control by the smart WiFi module and controlled by the AirConnect Smart application	Module dimensions: 86x86x12 mm.

HBV HIGH WALL

RHP03 included

+ PRODUCTS

- RCV03 remote control included
- DC Inverter tangential fan
- Panel digital screen
- Integrated electronic expansion valve
- Dry contact available

RWW05 (optional)

RWW03 (optional)

RWW07 (optional)

FEATURES

TECHNOLOGY:

ELECTRONIC EXPANSION VALVE

USER FUNCTIONS:

I FEEL

PROGRAMMABLE TIMER

AUTO RESTART (MEMORY)

INSTALLER FUNCTIONS:

ERROR CODE VIA INDOOR UNIT

DRY CONTACT ON/OFF

THE «SUSTAINABLE DEVELOPMENT»

→ Energy savings (mode locking, setpoint limits).

THE «USER»

→ Simple and elegant design.

→ Silent operation.

→ Multiple applications can be connected using the dry contact: room card, presence detection.

THE «INSTALLER»

→ Thickness.

THE «TECHNOLOGY»

→ Optimal regulation thanks to its electronic expansion valve.

RHP03
included

THE + «SUSTAINABLE DEVELOPMENT»

→ Energy savings (mode locking, setpoint limits).

THE + «USER»

- New simple and elegant design.
- Super-quiet unit.
- Upward and downward blowing for greater comfort.
- Multiple applications can be connected using the dry contact: room card, presence detection.

THE + «INSTALLER»

- Very compact.
- Ideal solution for rooms with low ceilings.

THE + «TECHNOLOGY»

- Optimal regulation thanks to its electronic expansion valve.

+ PRODUCTS

- RCV03 remote control included
- DC Inverter centrifugal fan
- Compact unit
- Bidirectional airflow
- Dry contact available

RWV05
(optional)

RWV07
(optional)

+ PRODUCTS

- Allows the combination of air handling units (AHUs) with the VRF system.
- Compatible with YE, YEVFD (4,5,6HP and 8,10,12HP) systems.
- Single kit capacity ranges from 3.5 to 73 kW (1-26 HP), multiple kits for larger capacity air handling units.
- The kit includes the control part and the EEV part (they can also be installed separately).
- 0-10V signal from the DDC controller (supplied by the installer).
- Supply air regulation (from DDC) or return air temperature control.
- Connect up to 3 integration AHU kits per VRF system for increased capacity.
- The mode can also be changed with the dry contact input (cooling, heating): change over.
- Fan speed can be selected by dry contact input (max. 3 fan speeds: low/medium/high).
- Output signal for defrost.

Airwell offers a range of connection kits, to connect VRF outdoor units to an air handling unit, in addition to indoor units.

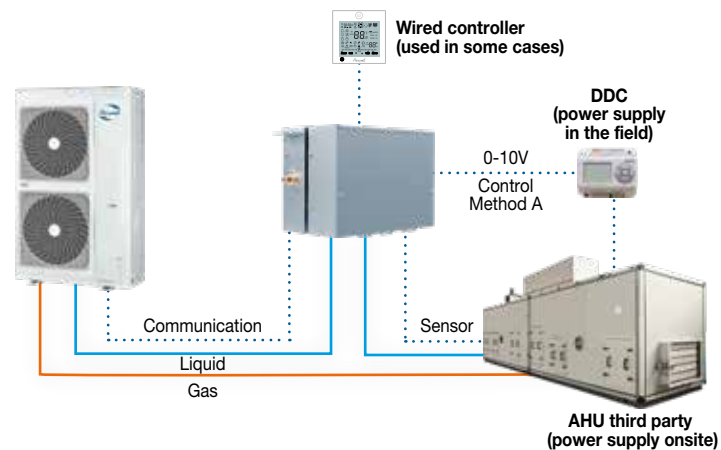

SYSTEM APPLICATION

- Offer a solution for large spaces to decrease the supply of fresh air with the VRF outdoor units by matching them with the air handling units. This solution makes it possible to combine the advantages of VRF with those of central air handling units.
- Meet the standards of European law: each workplace must be supplied with a minimum of 25 m³/h of fresh air. So this means that every office, every store and the majority of commercial buildings must be equipped with this solution in order to meet the standard...

4 CONTROL MODES AVAILABLE

CONTROL MODE A

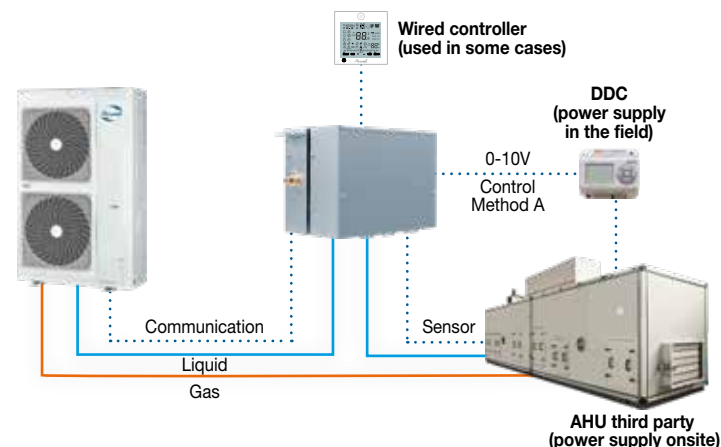

- DDC 0-10V signal output.
- The AHU kit receives a 0-10V signal to adjust the capacity of the ODU.

Note: wired controller is optional.
If the DDC can provide 0-10V, mode and on/off signals to the AHU kit, there is no need to connect the wired controller. If the 0-10V signal is sufficient, the wired controller is needed.

CONTROL METHOD B

- Control temperature via DDC.
- DDC 0-10V signal output.
- The AHU kit receives a 0-10V signal to adjust the setpoint temperature.

If the DDC can provide 0-10V, mode and on/off signals to the AHU kit, there is no need to connect the wired controller. If the 0-10V signal is sufficient, the wired controller is needed..

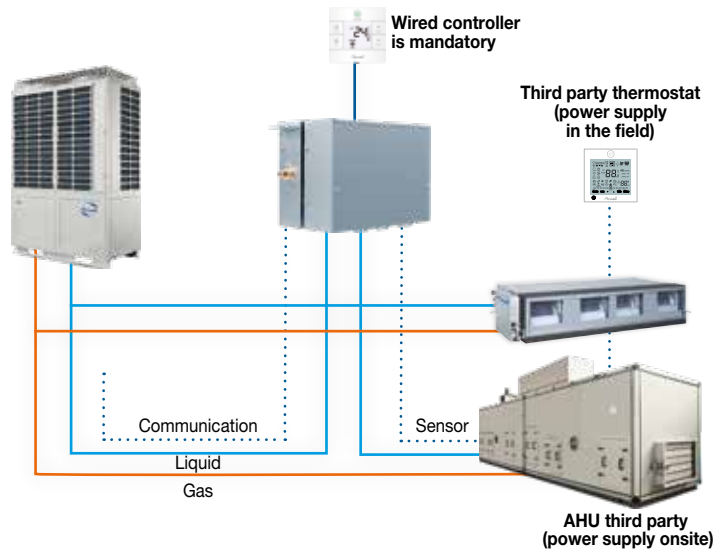

CONTROL METHOD C (special application)

- Without DDC.
- The wired controller is required for initial setup, but not required for operation.
- The third-party thermostat provides the On/Off signal to the AHU kit when the set temperature is reached.
- Applicable for some cases with constant cooling or heating demand and low comfort requirements.

CONTROL METHOD D

- Similar to the original AHU V1.0 kit.
- Control AHU as VRF indoor units.
- Return/room temperature control.
- Wired controller is required.
- Control method for combination of VRF indoor units and AHU system.

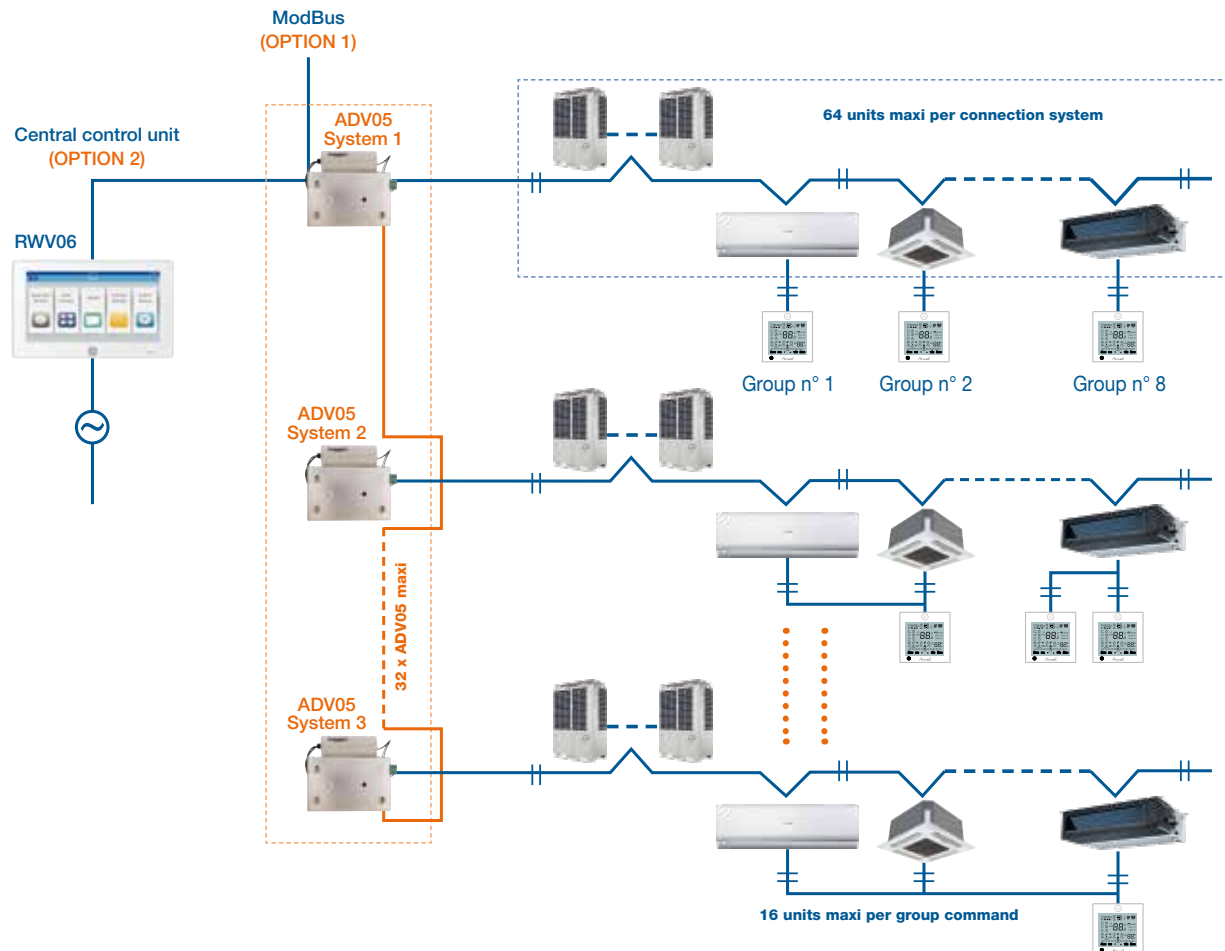

AHU KITS

Model	Designation	Part number
AHU kit 7	AHU kit <7 kW	7ACELH033
AHU kit 14	AHU kit 7 kW to 14 kW	7ACELH034
AHU kit 28	AHU kit 14 kW to 28 kW	7ACELH035
AHU kit 256	AHU kit 28 kW to 56 kW	7ACELH036
AHU kit 73	AHU kit 56 kW to 73 kW	7ACELH037

Central control solutions with ADV05

ONLY ONE GATEWAY: CENTRAL CONTROL OR MODBUS

TOUCH SCREEN CENTRAL REMOTE CONTROL RWV06

This command allows you to control and monitor the status of indoor units:

- Modern design.
- Intuitive and simple operation thanks to its 7" touch screen.
- Controls until 64 indoor units by system and 256 indoor units by central control.
- Can monitors until 32 systems thanks to 32 ADV05.

The main functions are:

- Reading operating parameters.
- Visualization of error codes.
- Weekly time: mode, fan speed, temperature.
- Sets LIFO (last enter have high priority).
- Creation and monitoring zones.
- ModBus RS485 -+.

Part number: 7ACELH023

CONTROL UNIT WITH WIFI OPTION RWV09

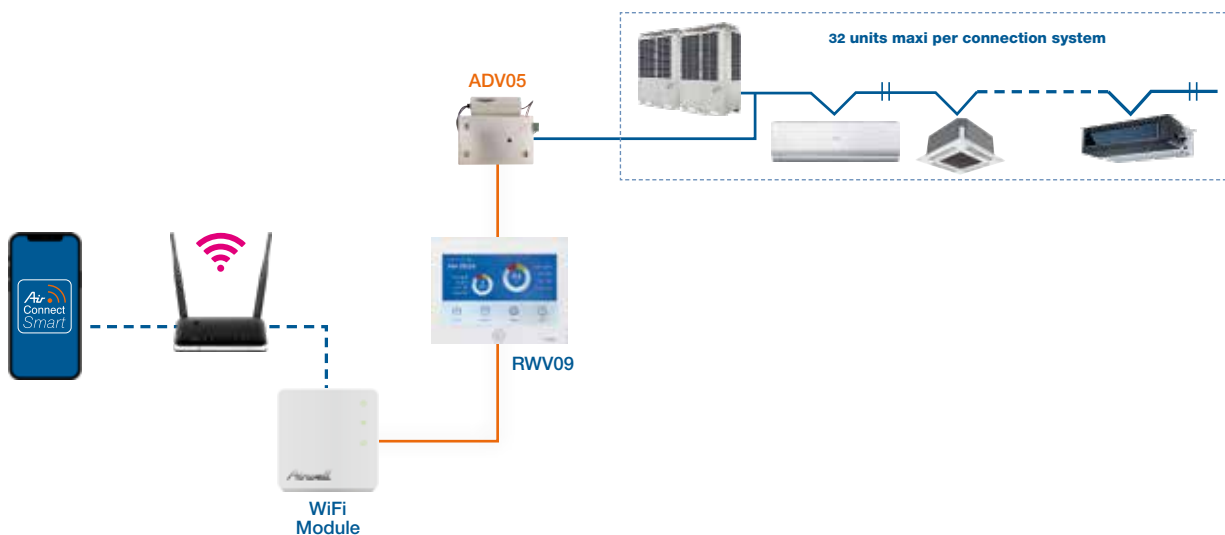

This command allows you to check the status of the indoor units and control them remotely!

- The WiFi option of the control makes it possible to make information about the application accessible.
- AirConnect Smart: so you can access it wherever you are.
- Clean and modern design.
- 5 inches TFT LCD touchscreen with backlight.
- Control up to 64 indoor units per system and per control unit.
- The control must be used in combination with an ADV05 for each VRF system.
- Possibility to connect up to 32 systems. Eco, Cool only / Heat only can be configured according to actual needs.

Main features:

- Reading and operating parameters.
- History and display of error codes.
- The weekly timer for some or all of the units can be set only once, except for the date or the duty cycle. Editing indoor unit information.
- Modbus RTU signal output: can be combined with a WiFi module or a third-party device.

WIRE CONTROLLER RWV05

Functions

Model		RWV05
Basic function	On/off	√
	Adjusting the setpoint temperature	√
	Fan speed selection	√
	Selecting the operating mode	√
	Airflow adjustment	√
Display	Clock	√
	Temperature display	√
	Humidity level display	√
Function	Individual control: one control per indoor unit	√
	Group control: one command to control up to 16 indoor units	√
	On/off timer	√
	Individual shutter adjustment (for cassette units with 360° rounded corners)	√
	Infrared signal receiver: allows the joint use of an infrared control for ducted units	√
Installation	Display of error codes	√
	Static pressure adjustment for ducted units	√
