

ENGINEERING DATA

**PACKAGED COOLING - 50HZ**

**CHA16**

**-024-036-048-060**

7.0 to 17.6 kW (2 to 5 Ton)

Cooling Capacity - 5.6 to 14.8 kW (19 200 to 50 500 Btuh)

Optional Electric Heat - 4 to 19 kW (14 300 to 65 400 Btuh)

Bulletin Number 490102

February 2001

Supersedes 490034 (October 1994)

CHA16 Basic Unit

CHA16 Rooftop Installation With Combination Supply and Return Air System

CHA16 Rooftop Installation With Horizontal Economizer

**MODEL NUMBER IDENTIFICATION**

**CHA 16 - 036 - 1 M**

Unit Type  
CHA = Packaged Cooling Unit

Series

Nominal Cooling Capacity kW (Tons)

- 024 - 7.0 (2)
- 036 - 10.6 (3)
- 048 - 14.1 (4)
- 060 - 17.6 (5)

Voltage

M = 380/420v-3 phase-50hz

T = 220/240v-1 phase-50hz

Minor Revision Number

**FEATURES**

**Air Flow Choice**

- Bottom (down-flow) or horizontal supply and return air.

**Cabinet**

- Heavy gauge, galvanized steel cabinet with five station metal wash process.
- Powder enamel paint, electrostatically bonded to the metal, provides superior rust and corrosion protection.
- Control box is conveniently located with all controls factory wired.
- Large removable panels provide service access.
- Base section and cabinet panels exposed to conditioned air are lined with thick fiberglass insulation.
- Flanged supply and return air openings.
- Electrical inlets furnished for entry into the cabinet.
- Evaporator coil drain pan constructed of painted, corrosion resistant galvanized steel with galvanized pipe drain outlet.
- Lifting brackets factory installed.

**Refrigeration System**

- All models include: expansion valve, liquid line strainer, suction and liquid line service gauge ports, high pressure switch (manual reset) and full refrigerant charge.
- Freezestat prevents coil freeze-up during low ambient operation or loss of air flow.
- Low ambient operation down to -1°C (30°F).

NOTE - Due to Lennox' ongoing commitment to quality, Specifications, Ratings and Dimensions subject to change without notice and without incurring liability. Improper installation, adjustment, alteration, service or maintenance can cause property damage or personal injury. Installation and service must be performed by a qualified installer and servicing agency.

## FEATURES - CONTINUED

### Compressor

- Designed for dependable efficiency with minimum operating cost.
- Suction cooled and overload protected with internal pressure relief.
- Hermetically sealed with built-in protection from excessive current and temperatures.
- Immersible self-regulating, crankcase heater assures proper compressor lubrication (-024 models).
- Running gear assembly resiliently suspended internally inside case. Compressor installed in unit on resilient rubber mounts assuring low sound and vibration free operation.
- Scroll compressor furnished with -036-060 models.
- Reciprocating compressor furnished with -024 models.

### Condenser Fan

- Direct drive fan moves large air volumes uniformly through entire condenser coil for high refrigerant cooling capacity.
- Vertical air discharge keeps air up and away from building.
- Permanently lubricated, permanent split capacitor (PSC) motor.
- Motor totally enclosed for maximum protection from weather, dust and corrosion.
- Corrosion resistant polyvinyl chloride (PVC) coated steel wire fan guard is furnished as standard.

### Copper Tube/Enhanced Fin Coil

- Lennox designed and fabricated coil.
- Ripple-edged aluminum fins.
- Long life copper tubing for ease of field servicing.
- Enhanced tubing for improved efficiency.
- Lanced fins provide maximum exposure of fin surface to air stream resulting in excellent heat transfer.
- Fin collars grip tubing for maximum contact area.
- Flared shoulder tubing connections/silver soldering construction.
- Coil is factory tested under high pressure to insure leakproof construction.

### Blower

- Multi-speed direct drive blowers.
- Each blower assembly statically and dynamically balanced.
- Multiple-speed permanent split capacitor (PSC) motor resiliently mounted.
- Blower speeds are easily changed on the blower motor.
- See blower performance tables.

### Air Filter

- Washable or vacuum cleanable 25mm (one inch) thick polyurethane frame type air filter.
- Filter rack is furnished for field installation in down-flow applications.
- Filter rack will accept up to 51mm (two inch) thick filter.
- Filters must be field installed in return air duct for horizontal applications without economizer.
- See dimension drawings.

### Economizer Wiring

- Furnished and factory installed.
- Economizer wiring harness with jack plug connections.
- See page 3 for economizer options.

### Unit Testing

- Rated test conditions are those included in Air Conditioning and Refrigeration Institute (ARI) Standard 210/240 while operating at rated voltage and air volumes.
- Sound numbers rated at test conditions included in Air Conditioning and Refrigeration Institute (ARI) Standard 270.
- Units and components are bonded for grounding to meet safety standards for servicing required by Underwriter's Laboratories (UL) and the International Electrotechnical Commission (IEC).
- Blower data is from unit tests conducted in the Lennox Laboratory air test chamber.
- Developed in accordance with ISO 9002 quality standards.

## OPTIONAL ACCESSORIES - MUST BE ORDERED EXTRA

Model Number		CHA16-024	CHA16-036	CHA16-048	CHA16-060
<b>Ceiling Diffusers</b> - Aluminum grilles, large center grille, insulated diffuser box with flanges, hanging rings furnished, interior transition (even air flow), internally sealed (prevents recirculation), adapts to T-bar ceiling grids or plaster ceilings - Net Weight	<b>Step-Down</b> - double deflection louvers	RTD9-65 - 30 kg (67 lbs.)			
	<b>Flush</b> - fixed blade louvers	FD9-65 - 17 kg (37 lbs.)			
<b>Ceiling Diffuser Transitions (Supply and Return)</b> — Used with diffusers, installs in roof mounting frame, galvanized steel construction, flanges furnished for duct connection, fully insulated - Net Weight		SRT16 - 20 lbs.) (9 kg)			
<b>Coil Guards</b> - Polyvinyl Chloride (PVC) coated steel wire guards to protect outdoor coil.		LB-82199CF ( <b>47J23</b> ) 2 guards per order		LB-82199CG ( <b>47J24</b> ) 3 guards per order	
<b>Control Systems</b> - See pages 4-5 for complete listing.		See pages 4-5			
<b>Economizer with Gravity Exhaust Dampers (Down-Flow)</b> - Installs directly in cabinet, recirculated air dampers with pressure operated gravity exhaust damper, formed, gasketed damper blades, nylon bearings, 24v damper motor has adjustable minimum position switch, electronic discharge air sensor, adjustable outdoor air enthalpy control. Utilizes filter furnished with unit, filter rack will accept up to 51 mm (2 in.) filter. Removable exhaust air hood and outdoor air intake hood with cleanable aluminum mesh filter. Choice of economizer controls. Model Number - Net Weight - Number and size of filter - mm (in.)	3 position	REMD16-41 - 22 kg (48 lbs.)		REMD16-65 - 30 kg (66 lbs.)	
	Fully modulating	REMD16M-41 - 22 kg (48 lbs.)		REMD16M-65 - 30 kg (66 lbs.)	
	☐ Indoor Filter	(1) 406 x 635 x 25 (16 x 25 x 1)		(1) 508 x 635 x 25 (20 x 25 x 1)	
	Outdoor Filter	(1) 356 x 635 x 25 (14 x 25 x 1)		(1) 457 x 635 x 25 (18 x 25 x 1)	

Continued On Next Page ►

**OPTIONAL ACCESSORIES - MUST BE ORDERED EXTRA**

Model Number		CHA16-024	CHA16-036	CHA16-048	CHA16-060
<b>Economizer Dampers (Horizontal)</b> - Installs directly in cabinet, combination outdoor air and recirculated air damper, formed, gasketed damper blades, nylon bearings, 24v damper motor has adjustable minimum position switch, electronic discharge air sensor, adjustable outdoor air enthalpy control. 25 mm (1 in.) fiberglass filter furnished, filter rack will accept up to 51 mm (2 in.) filter, outdoor air intake hood with aluminum mesh filter. Choice of economizer controls. Model Number - Net Weight - Number and size of filter - mm (in.)	3 position	EMDH16-41 - 50 kg (110 lbs.)		EMDH16-65 - 59 kg (130 lbs.)	
	Fully modulating	EMDH16M-41 - 50 kg (110 lbs.)		EMDH16M-65 - 59 kg (130 lbs.)	
	Indoor Filter	(1) 508 x 610 x 25 (20 x 24 x 1)		(1) 406 x 635 x 25 (16 x 25 x 1) (1) 356 x 635 x 25 (14 x 25 x 1)	
	Outdoor Filter	(1) 203 x 610 x 25 (8 x 24 x 1)		(1) 203 x 711 x 25 (8 x 28 x 1)	
<b>Economizer Differential Enthalpy Control</b> - Used in conjunction with outdoor air enthalpy control. Determines and selects which air has the lowest enthalpy. Return air enthalpy sensor field installs in economizer damper section		<b>54G44</b>			
<b>Economizer Gravity Exhaust Dampers (Horizontal)</b> - For use with EMDH16. Pressure operated assembly field installs in the return air duct adjacent to the economizer assembly. Includes bird screen. - Net Weight		GEDH16-65 - 2 kg (4 lbs.)			
<b>Electric Heat</b> - Field installed, helix wound nichrome elements, time delay for element staging, individual element limit controls, wiring harness, may be two-stage controlled. <b>ECH16R</b> - Supplemental thermal cutoff safety fuses and thermal relay sequencer. <b>ECH16</b> - Supplemental secondary limits, heating control relay, fuse block and galvanized steel control box.		See Electric Heat Data Tables Pages 8-11			
<b>Electric Heat Single Point Power Source Sub-Fuse Box</b> - Use with ECH16R electric heaters, use in conjunction with ECH16 fuse box for single point power source applications, installs internal to unit, fuses furnished, constructed of galvanized steel with prepunched mounting holes		See Electric Heat Data Tables, Pages 8-11			
<b>Hail Guards</b> - Heavy duty field installed guards protect coil from damage. Not used with Coil Guards.		<b>90N90</b>		<b>90N91</b>	
<b>Low Ambient Control Kit</b> - Units operate down to -1°C (30°F) outdoor air temperature in cooling mode without any additional controls. A Low Ambient Kit can be field installed, enabling unit to operate properly down to -17.7°C (0°F).		LB-57113BC ( <b>24H77</b> )			
<b>Outdoor Air Damper Section</b> - For down-flow applications, damper assembly replaces blower access panel, manually adjustable, 0 to 25% (fixed) outdoor air, outdoor air hood with cleanable filter included, number and size of filter - Net Weight		OAD16-41 - 5 kg (12 lbs.) (1) 127 x 432 x 25 mm (5 x 17 x 1 in.)		OAD16-65 - 5 kg (12 lbs.) (1) 203 x 432 x 25 mm (8 x 17 x 1 in.)	
<b>Outdoor Air Damper Section</b> - For horizontal applications, installs in return air duct adjacent to unit, manually adjustable (fixed) outdoor air - Net Weight		OAD3-46/65 - 4 kg (8 lbs.)			
<b>Outdoor Thermostat Kit</b> - Used to lock out some of the electric heating elements on indoor units where two stage control is applicable. Outdoor thermostat maintains the heating load on the low power input as long as possible before allowing the full power load to come on line	Thermostat Kit	LB-29740BA ( <b>56A87</b> )			
	Mounting Box	M-1595 ( <b>31461</b> )			
<b>Roof Curb Power Entry Kit</b> - Allows power entry through roof mounting frame, knockouts provided in roof frame, kit contains 40 in. (1016 mm) armored conduit and installation hardware, two kits are required, one for 24V and one for high voltage. See Dimension Drawing	13 mm (1/2 in.)	<b>18H70</b>			
	26 mm (1 in.)	<b>18H71</b>			
	39 mm (1-1/2 in.)	<b>18H72</b>			
<b>Roof Mounting Frame</b> - Nailer strip furnished, mates to unit, U.S. National Roofing Contractors Approved, shipped knocked down. RMF16-41 may be used on all sizes, with a slight unit overhang on CHA16-048 and CHA16-060 units - Net Weight NOTE - Sound Reduction Plate must be ordered separately for field installation.		RMF16-41 - 35 kg (75 lbs.) ( <b>97G59</b> ) Plate (ordered separately) ( <b>73H80</b> )		RMF16-41 - 35 kg (75 lbs.) ( <b>97G59</b> ) Plate (ordered separately) ( <b>73H80</b> ) RMF16-65 - 39 kg (86 lbs.) ( <b>97G60</b> ) Plate (ordered separately) ( <b>73H82</b> )	
<b>Timed Off Control</b> — Prevents compressor short-cycling and allows time for suction and discharge pressure to equalize, permitting the compressor to start in an unloaded condition. Automatic reset control provides a time delay between compressor shutoff and start-up.		LB-50709BK ( <b>47J27</b> )			
<b>Unit Single Point Power Source Sub Fuse Box</b> - Installs internal to unit, provides sub-fusing to the unit, used in conjunction with ECH16 or ECH16R for single point power source applications, fuses furnished, constructed of galvanized steel with prepunched mounting holes and electrical inlet and outlet holes, hinged box cover		See Electric Heat Data Tables, Pages 8-11			
<b>Unit Stand-Off Mounting Kit</b> — Elevates horizontal application units above mounting surface. Includes six high impact polystyrene stand-off mounts. See dimension drawings.		<b>38H18</b>			

□ Indoor filter is not furnished with economizer. REMD16 utilizes existing filter furnished with CHA16 unit.

**OPTIONAL CONVENTIONAL TEMPERATURE CONTROL SYSTEMS (FIELD INSTALLED)**

System and Component Description		Catalog Number																								
<b>ELECTRO-MECHANICAL THERMOSTAT</b>																										
<b>Thermostat</b> — Two stage heat & two stage cool with dual temperature levers, subbase choice		<b>13F06</b>																								
<b>Subbase</b> — Manual system switch (Off-Heat-Auto-Cool), fan switch (Auto-On)		<b>13F17</b>																								
<b>Status Panel</b> — May be ordered extra		<b>See Page 5 for Selection</b>																								
<b>Night Setback Operation</b> — Order components below		—																								
<b>Thermostat</b> — One stage heat & one stage cool		<b>12F99</b>																								
<b>Subbase</b> — Non-switching		<b>13F16</b>																								
<b>Time Clock</b> — 7 day operation, indicates day and night periods, 2 hour increments, battery back-up		<b>See Price Book for Selection</b>																								
<b>Time Clock</b> — 24 hour night setback operation, 15 minute increments, battery back-up		<b>See Price Book for Selection</b>																								
<b>HONEYWELL T7300 THERMOSTAT</b>																										
<b>Thermostat</b> — Programmable, internal or optional remote temperature sensing (sensor required), touch sensitive keyboard, automatic switching, °F or °C readout, no anticipator, droop/no droop selection, indicator LED's, hour/day programming, override capabilities, time and operational mode readout, stage status indicators, battery back-up, subbase choice, manual system switch (Heat-Off-Auto-Cool), fan switch (Auto-On)		<b>37L54</b>																								
<b>Subbase</b> — Selectable staging, indicator LED's, auxiliary relay output for economizer operation	Up to two stage heat & two stage cool	<b>37L55</b>																								
	Up to three stage heat & three stage cool	<b>37L53</b>																								
<b>Sensor</b> — Room temperature		<b>58C92</b>																								
<b>Sensor</b> — Room temperature with 3 hour override and setpoint adjustment		<b>86G67</b>																								
<b>Sensor</b> — Return air temperature		<b>27C40</b>																								
<b>Status Panel</b> — May be ordered extra		<b>See Page 5 for Selection</b>																								
<b>HONEYWELL T8600/T8624 THERMOSTAT</b>																										
<b>Thermostat</b> — Programmable, touch sensitive keypad, automatic heat/cool switching, °F or °C readout, indicator LED's, four temperature settings per daily schedule, override capabilities, time and operational mode readout, battery back-up (batteries included)		—																								
<b>T8600 Thermostat</b> — 1 heat/1 cool, 7 day programming, wiring wall plate included		<b>T8600D (37L59)</b>																								
<b>T8624 Thermostat</b> — 2 heat/2 cool, 7 day programming, switching subbase included		<b>T8624D (37L61)</b>																								
<b>Status Panel</b> — May be ordered extra		<b>See Below for Selection</b>

# CONVENTIONAL COMMERCIAL TEMPERATURE CONTROL SELECTION FLOWCHARTS

## ELECTRO-MECHANICAL THERMOSTAT

## HONEYWELL T7300 THERMOSTAT

## HONEYWELL T8600/T8624 THERMOSTAT

## FIELD WIRING

### BASIC UNIT

A — \*Four Wire 24V (Electro-mechanical)

— \*Five Wire 24V (Electronic)

B — Single or Three Phase with neutral

(See Electrical Data Table)

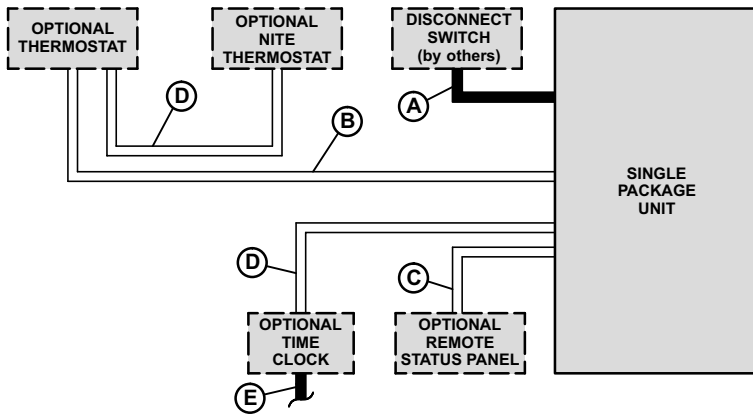

— Field Wiring Not Furnished —

\*When economizer with two stage thermostat is used, one additional wire is required

NOTE - All wiring must conform to local electrical codes.

# FIELD WIRING

## ELECTRO-MECHANICAL THERMOSTAT CONTROL SYSTEM

- A - Single or Three Phase with neutral (See Electrical Data Table)
- B - Six wire 24V
- C - Nine wire 24V
- D - Two wire 24V
- E - Two wire 24V

- Field wiring not furnished -

NOTE - All wiring must conform to local electrical codes.

## T7300/T8600/T8624 THERMOSTAT CONTROL SYSTEM

- A - Single or Three Phase with neutral (See Electrical Data Table)
- B - Nine wire 24V
- C - Two wire 24V
  - Seven wire 24V (T7300 Room Sensor with override)
- D - Nine wire 24V (T7300 with optional override sensor)
  - Seven wire 24V (T8624)
  - Four wire 24V (T8600)

- Field wiring not furnished -

NOTE - All wiring must conform to local electrical codes.

## ELECTRICAL DATA

Model Number		CHA16-024	CHA16-036	CHA16-048	CHA16-060
Line voltage data (50hz)		220/240v 1 phase	380/420v 3 phase with neutral		
Recommended maximum fuse size (amps)		25	15	15	20
†Minimum Circuit Ampacity		17	12	13	15
Compressor	Rated load (A)	9.6	6.2	6.4	8.0
	Locked rotor (A)	58	39	48	60
Condenser Coil Fan Motor (1 phase)	Full load (A)	1.4	1.4	1.1	1.1
	Locked rotor (A)	2.9	2.9	2.0	2.0
Evaporator Blower Motor	Full load (A)	2.9	2.8	3.4	3.4
	Locked rotor (A)	4.7	8.3	7.8	7.8

†Refer to local electrical codes to determine wire, fuse and disconnect size requirements. Use wires suitable for at least 75°C (167°F).

## GUIDE SPECIFICATIONS

### General

- Furnish and install a single package combination air to air direct expansion mechanical cooling system, complete with automatic controls.
- The single package unit shall be a standard product of a firm regularly engaged in the manufacture of heating-cooling equipment.
- The manufacturer shall test operate system at the factory before shipment.

### Air Distribution

- Equipment shall be capable of bottom (down-flow) or side (horizontal) handling of conditioned air.

### Refrigeration System

- The coils shall be non-ferrous construction with aluminum fins mechanically bonded to durable copper tubes. Coils shall be pressure leak tested.
- Outdoor coil shall be formed coil construction. Optional coil guards shall be available.
- Compressors shall be resiliently mounted and have overload protection. -036-048-060 models shall have scroll compressors. -024 models shall have reciprocating compressors and crankcase heaters. The refrigeration system shall have discharge, suction and liquid line service gauge ports, freestat, high pressure switch, liquid line strainer, expansion valve and full refrigerant charge.
- Control options available shall consist of low ambient controls, timed-off control and thermostat.

### Cabinet

- Shall be galvanized steel with a powdered enamel paint finish electrostatically bonded to the metal.
- Cabinet panels where conditioned air is handled shall be fully insulated to prevent sweating and minimize sound. Openings shall be provided for power connection entry.
- Supply and return air openings shall be flanged.
- Indoor coil condensate drain shall be provided.
- Lifting brackets shall be factory installed.

### Economizer Wiring

- Economizer wiring harness shall be furnished and factory installed.

### Service Access

- All components, wiring and inspection areas shall be completely accessible through removable panels.

### Supply Air Blowers

- Centrifugal supply air blower shall be direct driven by a multi-speed motor.
- Blower shall be statically and dynamically balanced.

### Outdoor Coil Fans

- Direct drive propeller type condenser fans shall discharge vertically.
- Fan motor shall be permanently lubricated and inherently protected.
- Fans shall have a safety guard.

### Air Filters

- Cleanable 25 mm (1 inch) thick filters shall be furnished.

## OPTIONAL ACCESSORIES

### Ceiling Diffusers

- Furnish and install a (flush or stepdown) optional combination ceiling supply and return air diffuser.

### Ceiling Diffuser Supply and Return Air Transitions

- Supply and return transitions shall be available, for field installation in the roof mounting frame, to facilitate duct connection to the diffuser.

### Coil Guards

- Shall be available for field installation.
- Guards shall protect coil from damage.

### Control Systems

- Shall provide a selection of thermostats and related controls to automatically operate the mechanical equipment through the heating or cooling and ventilating cycles as required.

### Electric Heaters

- Shall be available for field installation.
- Heating elements shall be nichrome bare wire exposed directly to the air stream.
- ECH16R safety devices shall consist of limit controls and thermal cutoff safety fuses. ECH16 safety devices shall consist of limit controls and fuse block.
- Optional heater sub-fuse box shall be available for ECH16R electric heaters for single point power supply applications.

### Economizer Dampers

- Furnish and install, complete with controls, an air mixing damper assembly including outdoor air and recirculated air dampers.
- The assembly shall provide for the introduction of outside air for minimum ventilation and free cooling.
- Damper motor shall be 24 volt fully modulating or three position spring return.
- Down-flow model shall include pressure operated gravity exhaust dampers.
- Controls shall include electronic discharge air sensor, minimum position switch, and solid-state adjustable enthalpy control.
- Control option available shall consist of differential enthalpy control (return air sensor).

### Economizer Horizontal Gravity Exhaust Dampers (for Horizontal Economizer)

- Pressure operated dampers shall install in return air duct for horizontal applications with EMDH16.
- Damper blades shall ride in nylon bearings and be gasketed for tight seal and quiet operation.

### Hail Guards

- Shall be available for field installation.
- Guards shall protect coil from damage.

### Outdoor Air Damper Section

- Optional manual outdoor dampers shall be available to provide outdoor air requirements of up to 25%.
- Damper section field installs external to the unit.
- Shall be equipped with outdoor air hood filter for extra air filtering and bird screen protection.

### Remote Status Panel

- Shall be available for installation within the conditioned area to observe equipment operation.
- The panel shall include signal lights for Cool Mode, Heat Mode, Compressor 1, Compressor 2, No Heat and Filter.

### Roof Curb Power Entry Kit

- Optional kit shall provide power entry to the unit through the roof mounting frame.

### Roof Mounting Frame

- Mechanical contractor shall install a steel roof mounting frame for bottom discharge and return air duct connection.
- It shall mate to the bottom perimeter of the equipment.
- When flashed into the roof it shall make a unit mounting curb and provide weatherproof duct connection and entry into the conditioned area.
- Flashing shall be the responsibility of a roofing contractor.

### Stand-Off Mounting Kit

- Optional kit shall be available to elevate unit above mounting surface in horizontal applications.

### Unit Single Point Power Source Unit Sub-Fuse Box

- Optional box shall field install internal to the unit and provide single point power source connection and sub-fusing for unit.
- Shall be of galvanized steel with mounting holes, electrical inlets and hinged cover.
